Learn to program devices for the Internet of Things in an intensive on-line course, build your own IoT solution and participate in a contest.

The winning projects will be awarded with valuable prizes.

Intelligent IoT oneM2M Hackathon

VIRTUAL

Free access*

April 27th to May 18th 2021

You just need your laptop, basic programming knowledge and a great desire to create.
You can participate individually or in a team of up to 4 members.

*** If you register by April 20th, you will get a free IoT kit**
