1: UK objects to the progression of 27043. The UK view is that 27043 had a high percentage of technical comments which is not congruent with a stable and mature standard ready to progress to DIS, and would therefore benefit for a further, 3rd, CD round.

2: US objects to the progression of 27043. The number of technical comments on the document were numerous enough that the changes need to be reviewed through another CD.
