## EC Standardisation Mandate M/453

- ❑ **Cooperative systems for Intelligent Transport within EU**

Minimum set of standards

Safety  
Sustainability  
Traffic efficiency

Communication  
Information  
Security

- ❑ **Standards development within CEN and ETSI – existing roadmaps**
- ❑ **Conformance and interoperability tests**
- ❑ **International coordination of standardisation activities**
- ❑ **International standards as part of the European standardisation**
- ❑ **Consultation and liaison with stakeholders – industry – R&D**

## Why is ETSI in a standardisation Mandate

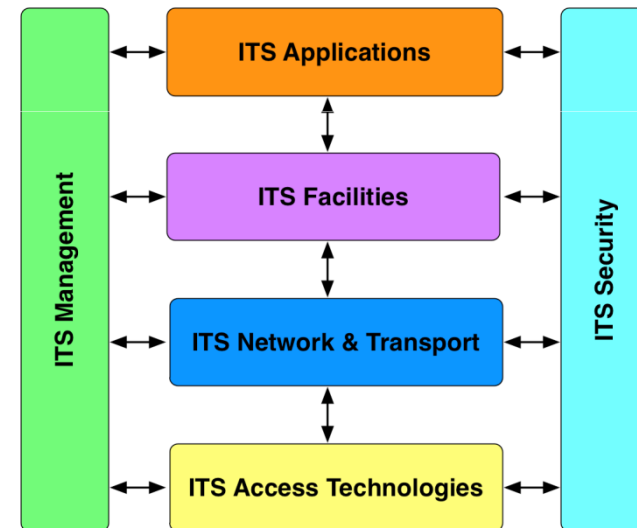

- We asked for the mandate!
- ETSI has a central role in European ITS standardisation
  - Within the last two years – a lot of results
  - Widespread participation from a variety of stakeholders
  - A smooth and quick decision process
- ETSI is the right partner to take standardisation forward
  
- The Mandate is a strong political support to ITS standardisation
- Common European standards foster interoperability
- Standardisation is an important step towards deployment
  
- Because we can do it....

## CEN – ETSI cooperation on the Mandate

- ❑ Joint Task Force – joint 1<sup>st</sup> phase report April 2010
  - Work program for the next 2-3 years of standardisation
  - The minimum set of standards for interoperability
  - Roadmap with milestones and timelines

- ❑ Split of work between CEN and ETSI
  - Work responsibility

- ❑ Stakeholder contacts – this workshop
- ❑ The results of the R&D projects
- ❑ International standardisation activities

- ❑ Standards developments including test specifications

**Yes we can...**
