

## Patrick Guillemin

ETSI - Strategy and New Initiatives

Patrick is responsible within the ETSI Secretariat for the development, coordination and management of new standardization initiatives. Patrick has 25 years of experience in IT and Telecommunications Project Management and 17 years in Standardization. He is standardization coordinator of the IoT European Research Cluster of the European Commission and actively participated in EU FP7 Projects related to the Internet of Things. Patrick supported the creation of ETSI Technical Committee GRID/CLOUD, ISG ISI (Information Security Indicators) and today ISG LIS (Localisation Industry Standards).

He was previously in charge of a number of ETSI's standardization committees and activities (RFID/IoT, GRID/Cloud, xDSL, Broadband Radio, PowerLine, Plugtests/Interop., IPv6, ENUM, SIPit...). He worked for ETSI Plugtests as Technical Manager (25 Plugtests events managed in 2 years) and was ETSI IT System Group Manager & Security Technical Manager.

In parallel, he was Software Engineering Teacher at Nice University (France) for 14 years. Between 1985 and 1993, he worked as CIO for the French Stock Exchange in Paris (*FERRI*) and for Digital Equipment Corporation (*DEC*) in Sophia Antipolis, France as Project Manager and consultant.

Patrick holds a degree in Engineering from the French University ENSAM (*Ecole Nationale Supérieure des Arts et Métiers*) and a Master's Degree in Software Engineering (*Génie Logiciel - CERICS*).
