

ETSI ISG-F5G: Results and Ambitions while approaching 2 years of activity

Presented by:

Luca Pesando, Chair of ISG F5G

October 13, 2021

Broadband World Forum

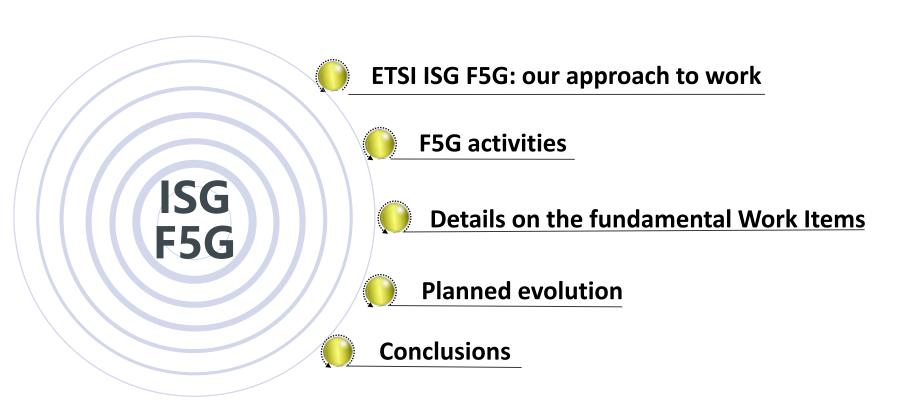

Physical Event: 12-14 October 2021,

RAI, Amsterdam

Virtual Event: 11 - 15 October, 2021

Agenda

Figure 2: Percentage of connected households by speed, by region, 2025

R1 Use Cases: mapping to technology evolution and applications

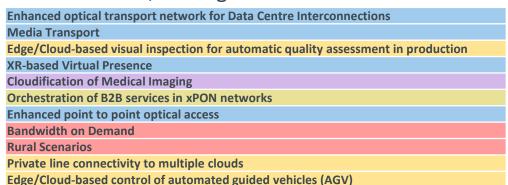

GR F5G 008: Use Cases Release 2

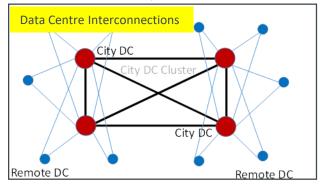

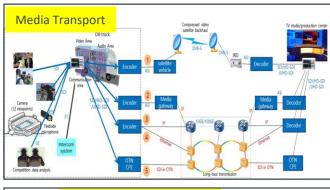

18 new Use Cases; closing new contributions at the end of September

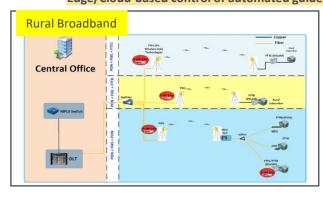

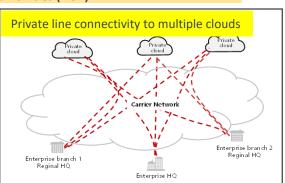

Stable Draft

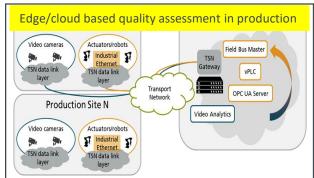

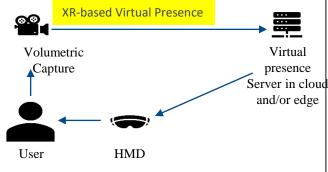

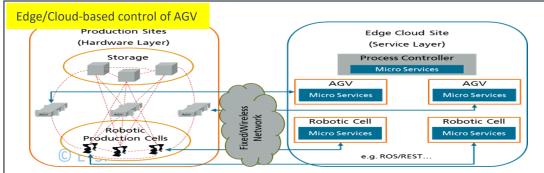

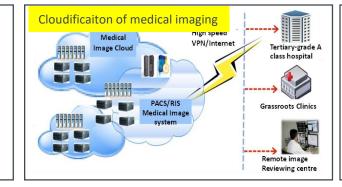

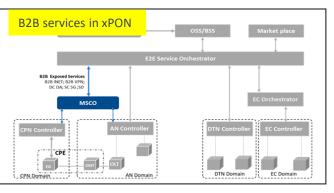

F5G GS 003: The Technology Landscape Deliverable

Aspects	Technical Requirement	Gap Analysis
Variety of data rate profile	• R1 • R2 • R3	 Gap 1 Gap 2 Gap 3
Lower optical link budget	• R4 • R5	 Gap 4 Gap 5
Seamless handover support for Wi-Fi connection	• R6 • R7 • R8	 Gap 6 Gap 7 Gap 8
Support of diversified transceiver	• R9	• Gap 9
Network security	• R10 • R11	• Gap 10 • Gap 11
Fibre infrastructure	• R12 • R13 • R14 • R15	 Gap 12 Gap 13 Gap 14 Gap 15
Power saving and management	• R16 • R17	 Gap 16 Gap 17
Support of network QoS	• R18	• Gap 18
Support of East-to-West data streaming	• R19	• Gap 19

Contribution to relevant SDOs

ETSI Internal development

- ISG F5G
- TC ATTM
- TC Cyber
- TC BRAN
- ISG ZSM/ENI......

> 55 actions requiring liaison with other SDOs

> 105 requirements identified

E.g. UC #4:

"PON onpremises" (FTTR)

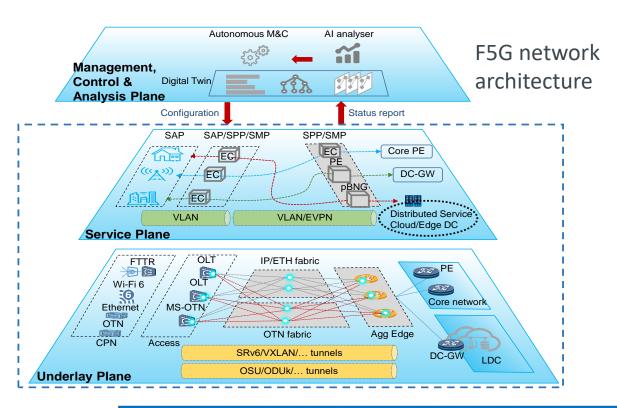

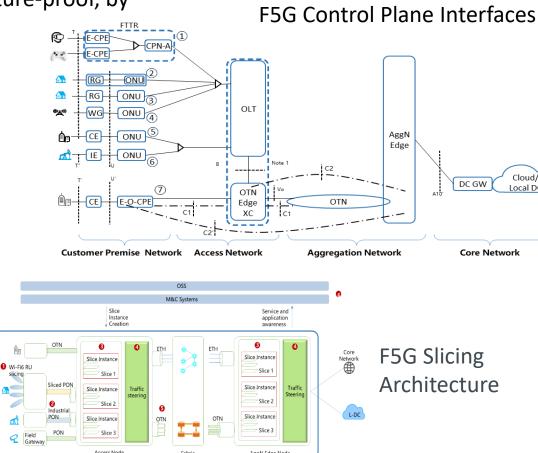

F5G Architecture (GS F5G 004) and further progress planned

 Architecture and E2E M&C are two of the main focus, and planned for publication in 3Q2021 and 1Q2022 respectively

FTTR is one of the drivers to make the architecture and E2E M&C future-proof, by

SLA based deployment, AI-enabling and dual IP and OTN fabrics...

Closing Summary and Remarks

Benefits

- ETSI ISG F5G purpose is to
 - deliver new and better BB services to the end users, with new service scenarios
 - enable 5G mobile services, with enhanced fibre back- and front-hauling
- Establish a collaborative model within the refence SDO's: don't reinvent the wheel
- Propose and define enhancements of the fixed network
 - in different segments (LAN, access, aggregation, transport)
 - at multiple layers (from optical components to OLT and ONT, slicing and orchestration, control and management) up to service and cloud support
- Address both public networks and private/verticals enabling various business models

Challenges

- Assure flexibility supporting disparate solutions with a single framework
- Simplify provisioning and OAM, e.g. by guided online self-installation and self-configuration
- Develop the best suited collaboration model with each reference SDO and assure all needed enhancements are timely available for implementation

Together, we make it happen.
