

The Standards People

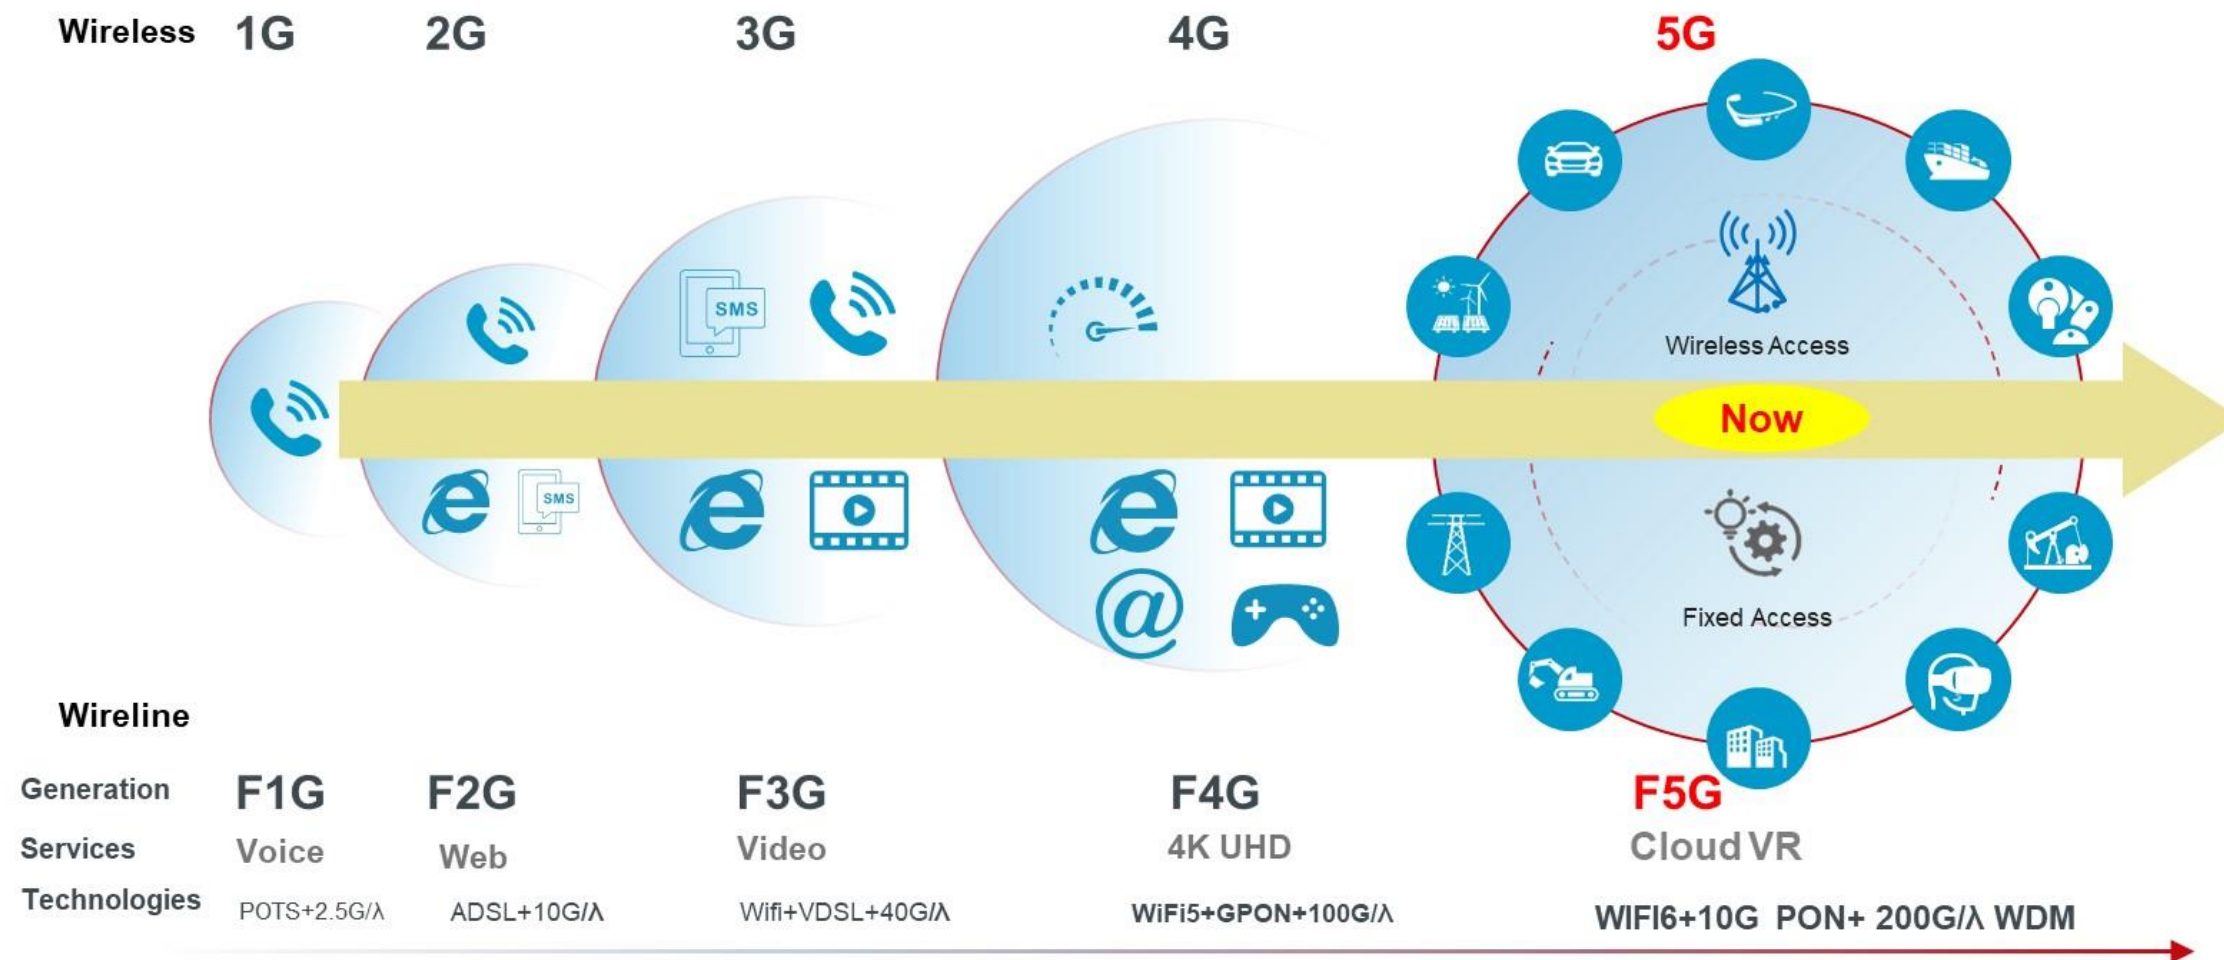

All-Optical Networks Enabled by ISG F5G

Presented by: Xiang Liu, Fellow of IEEE and OPTICA

NGON & DCI 2022, June 21, 2022, Barcelona, Spain

The 5th-Generation Fixed Network (F5G)

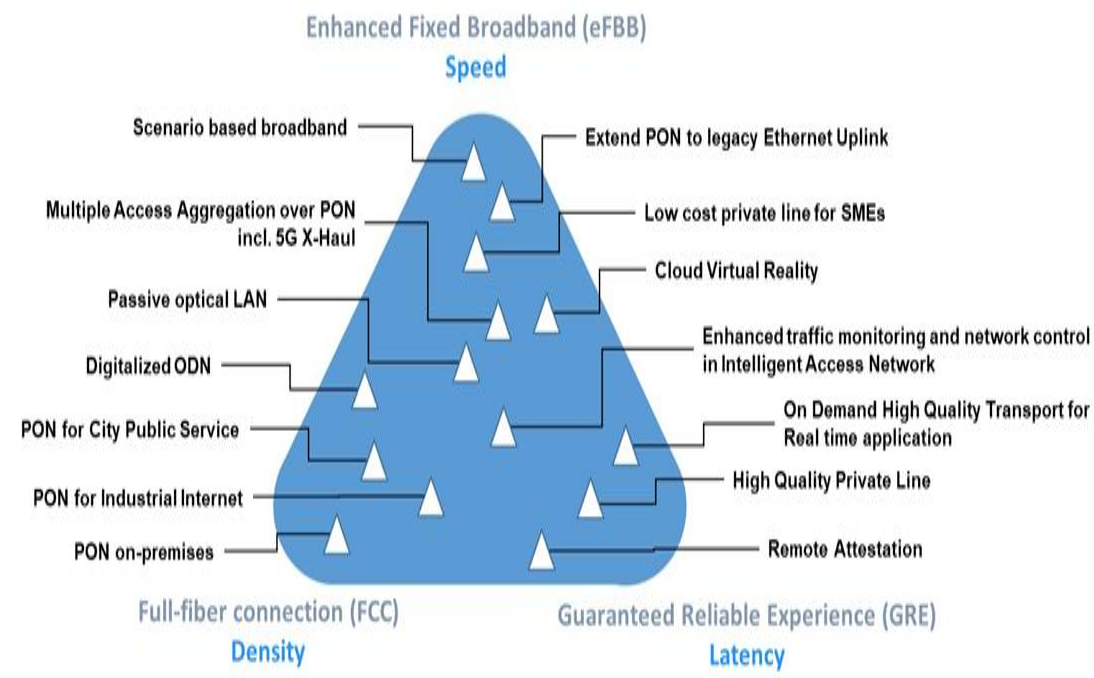

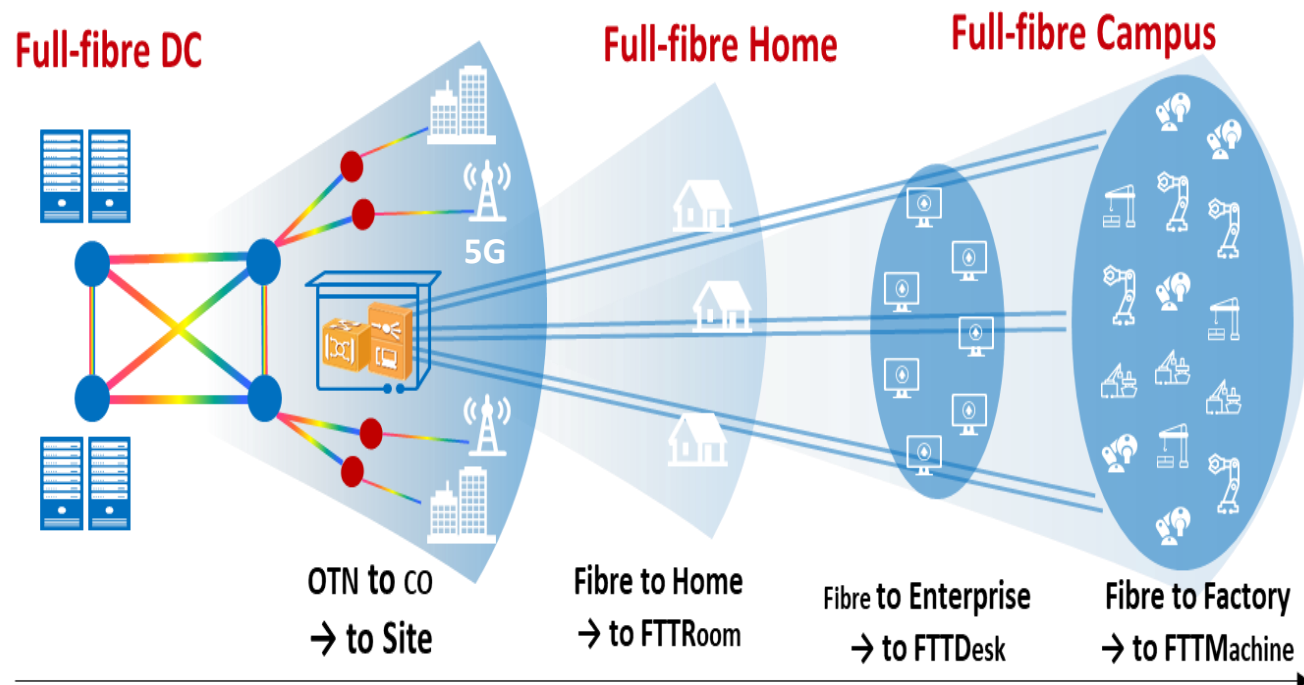

Generations definition: F5G together with 5G to build the new digital world

The F5G Vision: Fiber to Everywhere & Everything

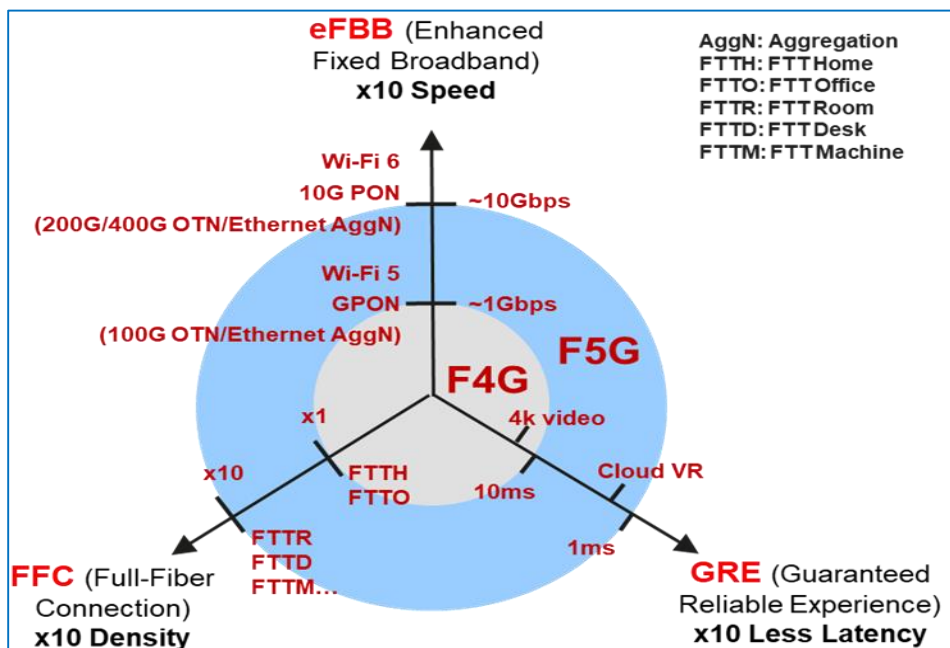

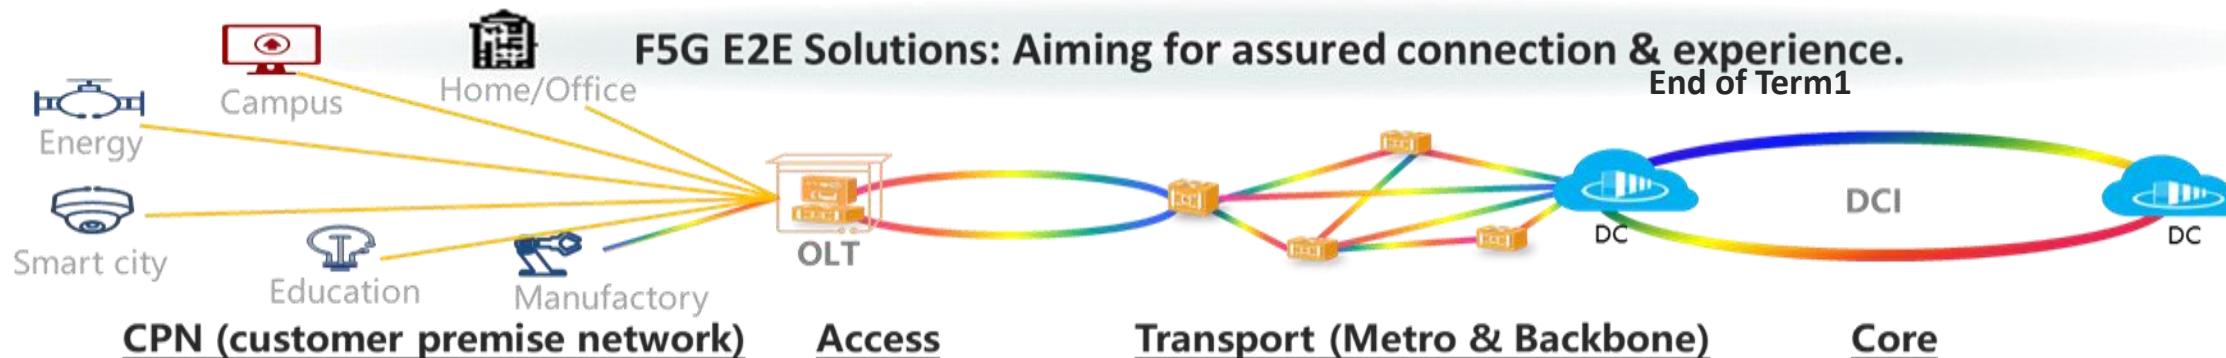

Fiber connectivity is becoming ubiquitous, extending from last “mile” to last “meter”

F5G enables many new use cases, expanding the application space of 5G

F5G's broad scope and cooperation with other SDOs

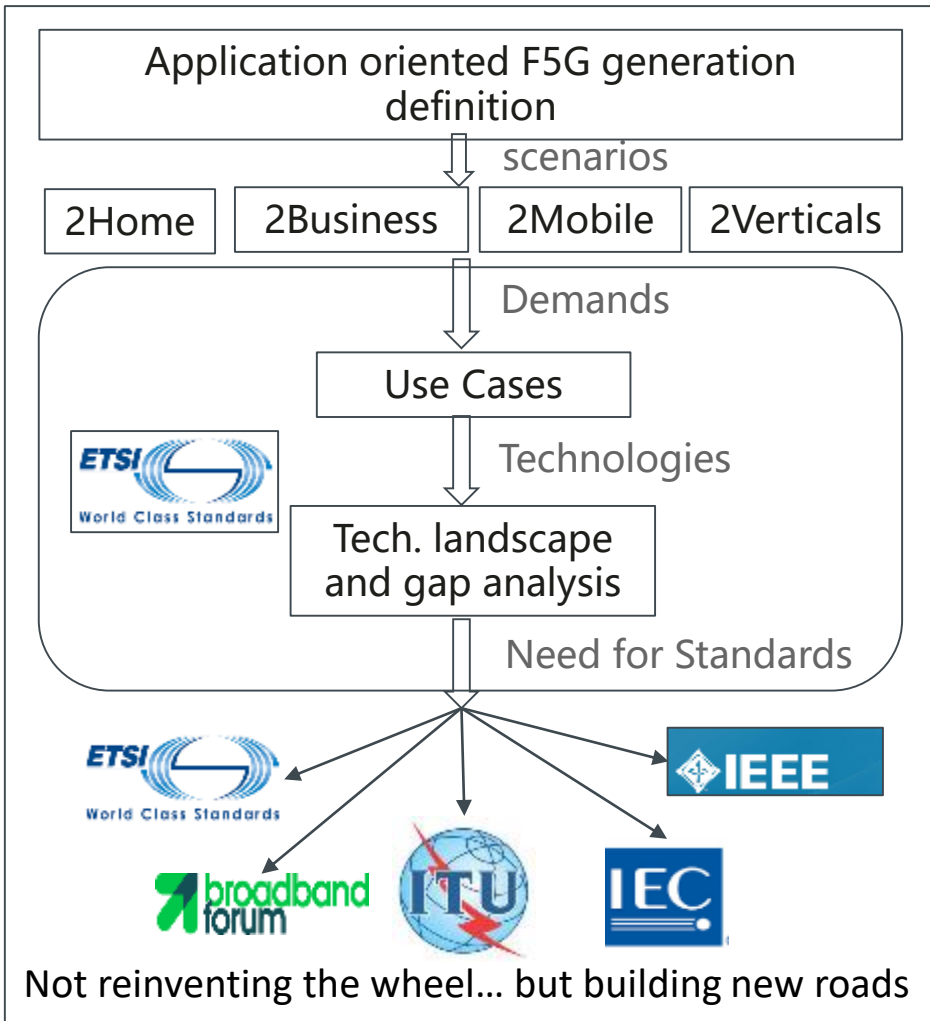

F5G focuses on end-to-end (E2E) network solutions for assured service connection & experience, and cooperates with other standards development organizations (SDOs) on topics such as

- FTTR/FTTH
- Optical access and aggregation
- Core network
- DCI network and optics
- Optical transport network
- Network control & management (C&M) ...

Value proposition of ISG F5G and synergy with other SDOs

ISG F5G as Hub

Not reinventing the wheel... but building new roads

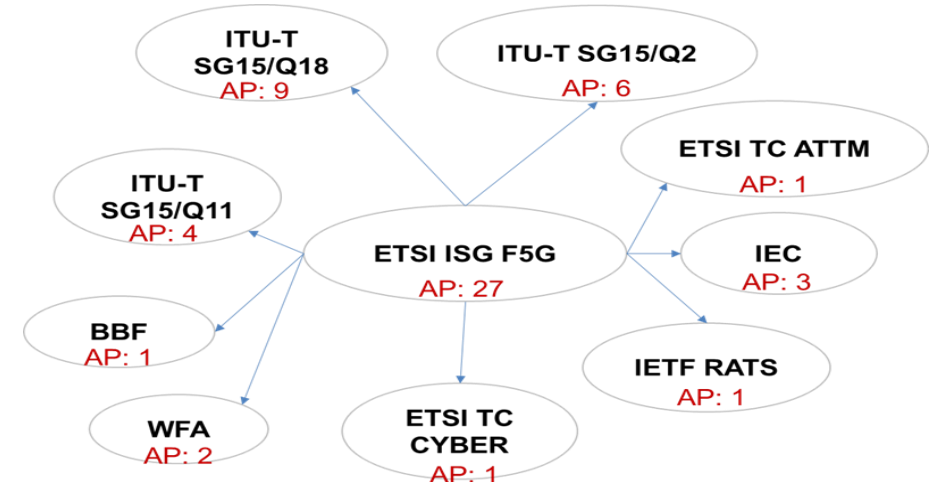

Example 1: 4-party (ETSI, ITU, CCSA and BBF) joint workshop dedicated to FTTR (on June 14, 2021)

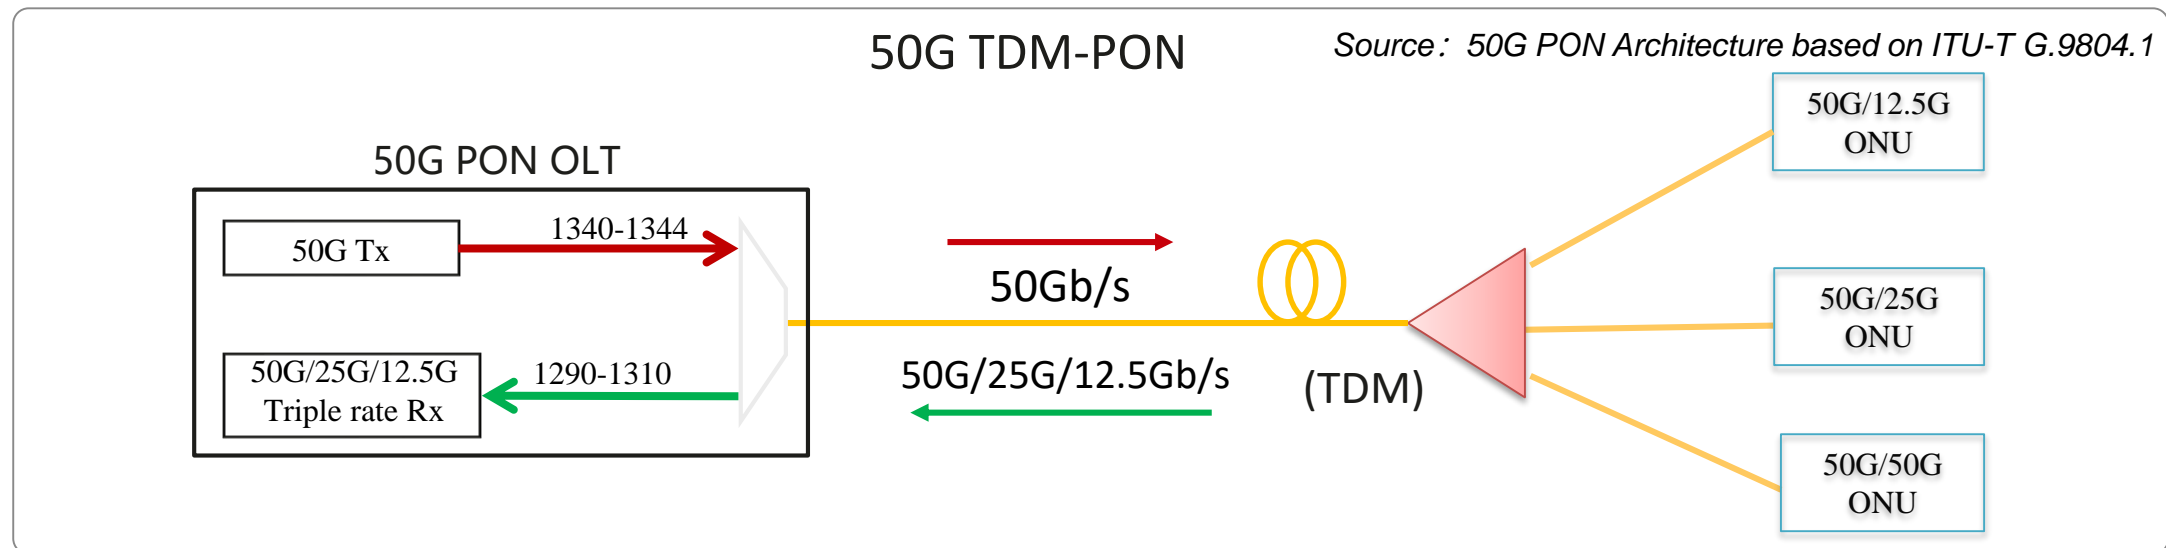

Co-organized by:

Example 2: 55 Liaison letters have been sent out from F5G to other SDOs for synergy

Optical Access: 50G PON standards progress

System Architecture: first introduction of optical DSP for performance improvements

Beyond 400G standards progress

IEEE P802.3df working items

Ethernet Rate	Assumed Signaling Rate	AUI	BP	Cu Cable	MMF 50m	MMF 100m	SMF 500m	SMF 2km	SMF 10km	SMF 40km
200 Gb/s	200 Gb/s	Over 1 lane		Over 1 pair			Over 1 Pair	Over 1 Pair		
400 Gb/s	200 Gb/s	Over 2 lanes		Over 2 pairs			Over 2 Pair			
800 Gb/s	100 Gb/s	Over 8 lanes	Over 8 lanes	Over 8 pairs	Over 8 pairs	Over 8 pairs	Over 8 pairs	Over 8 pairs		
	200 Gb/s	Over 4 lanes		Over 4 pairs			Over 4 pairs	1) Over 4 pairs 2) Over 4 λ's		
	TBD								Over single SMF in each direction	Over single SMF in each direction
1.6 Tb/s	100 Gb/s	Over 16 lanes								
	200 Gb/s	Over 8 lanes		Over 8 pairs			Over 8 pairs	Over 8 pairs		

Leverage existing or work-in-progress 100 Gb/s per lane (e.g. 3cu, 3ck, 3db) to higher lane counts

Develop 200 Gb/s per lane electrical signaling for 1/2/4/8 lane variants of AUIs and electrical PMDs

Develop 200 Gb/s per optical fiber for 1/2/4/8 fiber based optical PMDs and 4 lambda WDM optical PMD

Potential for either direct detect and / or coherent signaling technology

F5G proof-of-concept (PoC) demonstration on Cloud-VR

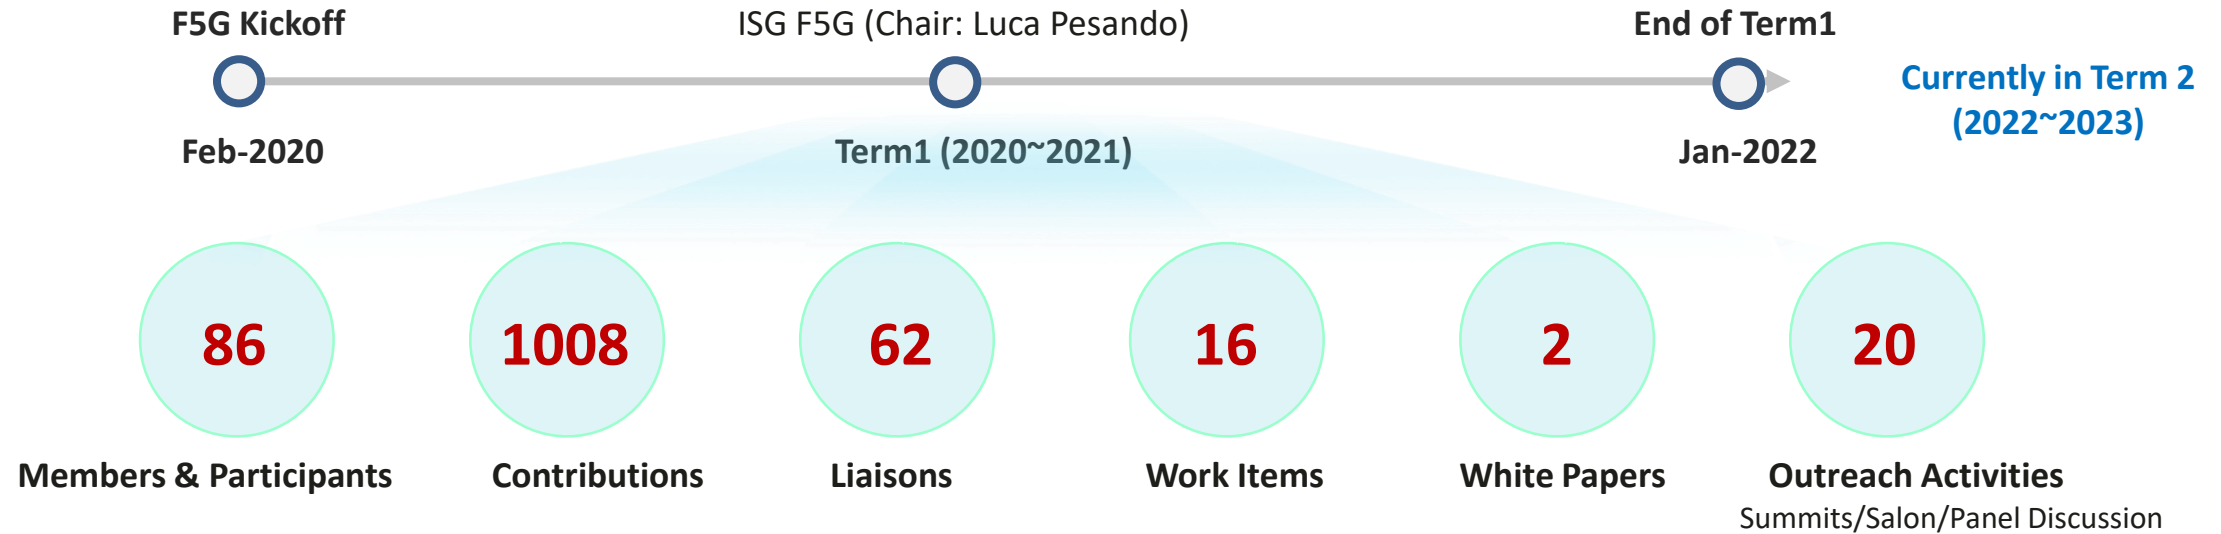

Recently, a PoC demonstration under the scope of the ETSI ISG-F5G has been conducted by Huawei, China Mobile and BUPT, showing real-time cloud-VR with agile (second-level) service creation/deletion and fine (~2 Mb/s) service bandwidth adjustment over an E2E F5G network consisting of CPN, AN, AggN and CN [1].

[1] Reported at the F5G Workshop at OFC 2022.

Now it's time for F5G to evolve to the next level

F5G: tri-angle features

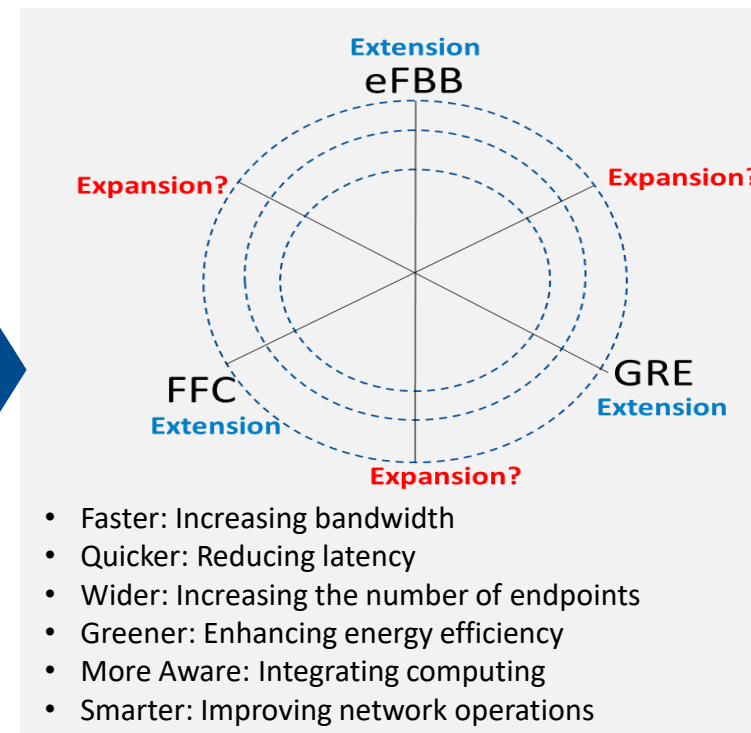

- The evolution of wireless has benefitted from having well-defined generations
- Fixed networks have lacked this structure and definition, and have had uneven deployment over time

New scenarios & services drive F5G development

- Fiber to everything everywhere? Higher speed? Greener?
- Smarter to guarantee experience of both operator and end user(digital twins, ADN L4) Lower latency and zero jitter for machine?

What F5G would be in next phase?

The detailed directions and visions are under consideration and will be published as white paper on **"F5G Advanced and Beyond"**.
