## Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: *"Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards"*, which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<https://ipr.etsi.org>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

### Trademarks

When trademarks are mentioned in the present document, please note that these trademarks are owned by their respective owners and that they are only mentioned on a citation way, without claiming any right on them. The present document does not give any right to use or reproduce these trademarks which remain the property of their respective owners.

---

## Foreword

This Group Report (GR) has been produced by ETSI Industry Specification Group (ISG) Network Functions Virtualisation (NFV).

---

## Modal verbs terminology

In the present document "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

---

# 1 Scope

The present document is an informative report defining the touchpoints/relations between the NFV Information Model [i.1] and information models from other organizations.

---

## 2 References

### 2.1 Normative references

Normative references are not applicable in the present document.

### 2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.

[i.1] ETSI GR NFV-IFA 015: "Network Functions Virtualisation (NFV) Release 2; Management and Orchestration; Report on NFV Information Model".

[i.2] Eclipse™ Gendoc tool.

NOTE: Available at <http://www.eclipse.org/gendoc/>.

[i.3] TM Forum GB922 R15.5.1: "TM Forum Information Framework".

[i.4] ONF™ TR-512: "Core Information Model (CoreModel) version 1.1", November 2015.

NOTE: Available at <https://www.opennetworking.org/sdn-resources/technical-library>.

[i.5] ETSI TS 128 622 (V13.1.0): "Universal Mobile Telecommunications System (UMTS); LTE; Telecommunication management; Generic Network Resource Model (NRM) Integration Reference Point (IRP); Information Service (IS) (3GPP TS 28.622 version 13.1.0 Release 13)".

[i.6] ETSI GS NFV 003: "Network Functions Virtualisation (NFV); Terminology for Main Concepts in NFV".

---

## 3 Definitions and abbreviations

### 3.1 Definitions

For the purposes of the present document, the terms and definitions given in ETSI GS NFV 003 [i.6] apply.

### 3.2 Abbreviations

For the purposes of the present document, the abbreviations given in ETSI GS NFV 003 [i.6] and the following apply:

UML® Unified Modelling Language

---

## 4 Overview

### 4.1 Introduction

The NFV Information Model, defined by ETSI GR NFV-IFA 015 [i.1], is focused on the management of the virtualisation aspects. Other models exist defined by other organizations and to provide an end-to-end model view, it is useful to be able to federate the NFV Information Model with other external models.

The approach used is to define interaction points between the NFV Information Model and some models from other organizations, allowing all organizations to extend their model based on the interaction points as they see needed.

The NFV Touchpoint Model, provided in annex A, only describes the touchpoints between various models.

The classes involved from each external model are defined in separate Papyrus models.

Both those external Papyrus models as well as the NFV Information Model are loaded as read-only in the NFV Touchpoint Model to create the needed relations between the models. This allows the NFV Information Model to remain independent of any external model.

### 4.2 Relation to other ETSI NFV ISG Specifications

The present document is referencing information from the following ISG NFV Group Specifications:

- Network Function Virtualization (NFV); Management and Orchestration; Report on NFV Information Model ETSI GR NFV-IFA 015 [i.1].

ETSI GR NFV-IFA 015 [i.1] provides the NFV Information Model that is used as a read-only reference.

---

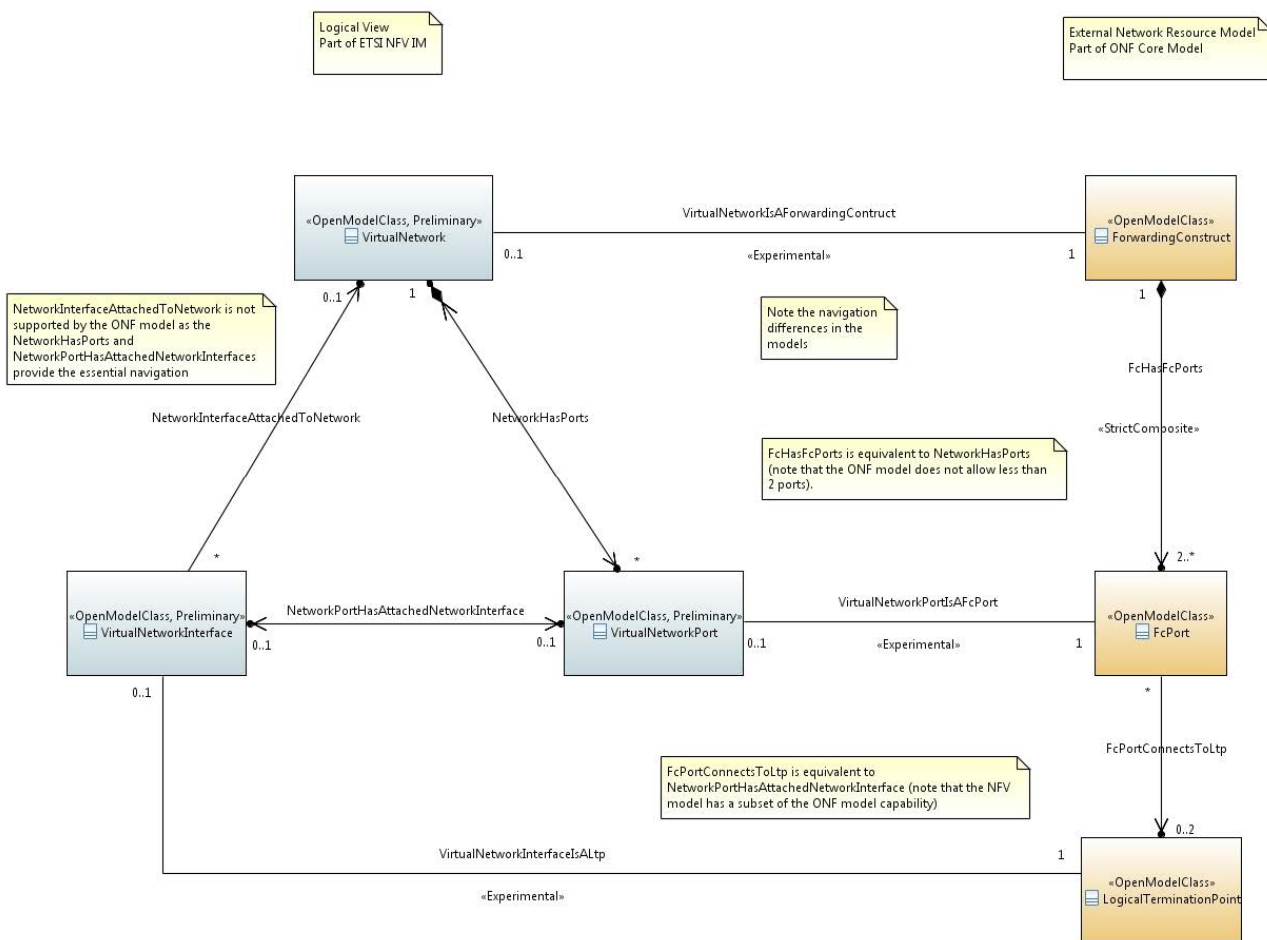

## 5 Touchpoints with external models

### 5.1 Touchpoints with ONF™ Core Model

For the current release of the NFV Information Model, the external Network Resource model is provided by the ONF™ Core Model [i.4].

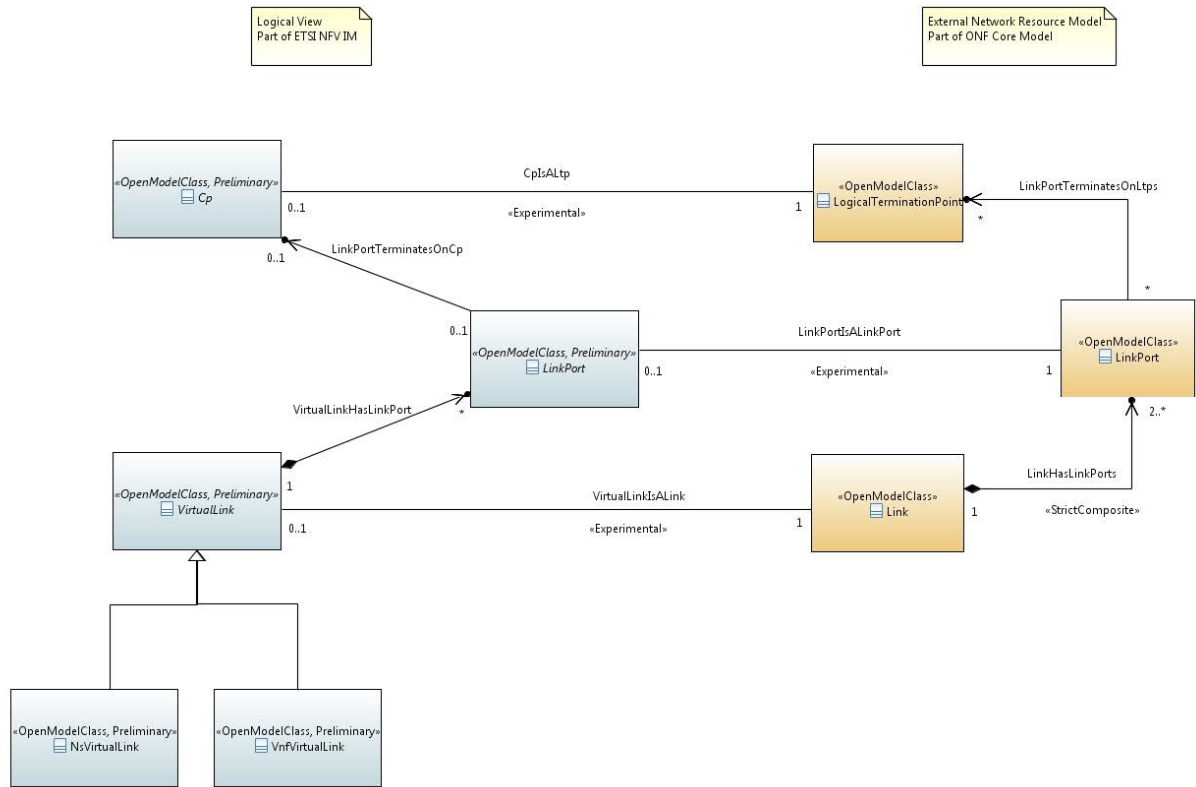

The needed classes from the ONF™ Core Model are defined in the External Network Resource Model and are outside of ETSI NFV scope.

Figure 5.1-1 shows the touchpoints between the NFV Information Model and the External Network Resource Model at Virtualized Resource level.

**Figure 5.1-1: Touchpoints between NFV Information Model and ONF™ Core Model at Virtualized Resource level**

Figure 5.1-2 shows the touchpoints between the NFV Information Model and the External Network Resource Model at Virtual Link level.

**Figure 5.1-2: Touchpoints between NFV Information Model and ONF™ Core Model at Virtual Link level**

## 5.2 Touchpoints with TM Forum model

### 5.2.1 Touchpoints with TM Forum Service Model

For the current release of the NFV Information Model, the external Service Model is provided as a subset of the TM Forum Informational Framework [SID] [i.3] Service Model.

The needed classes are defined in the External Service Model and are outside of ETSI NFV scope.

Figure 5.2.1-1 shows the touchpoints between the NFV Information Model and the External Service Model.

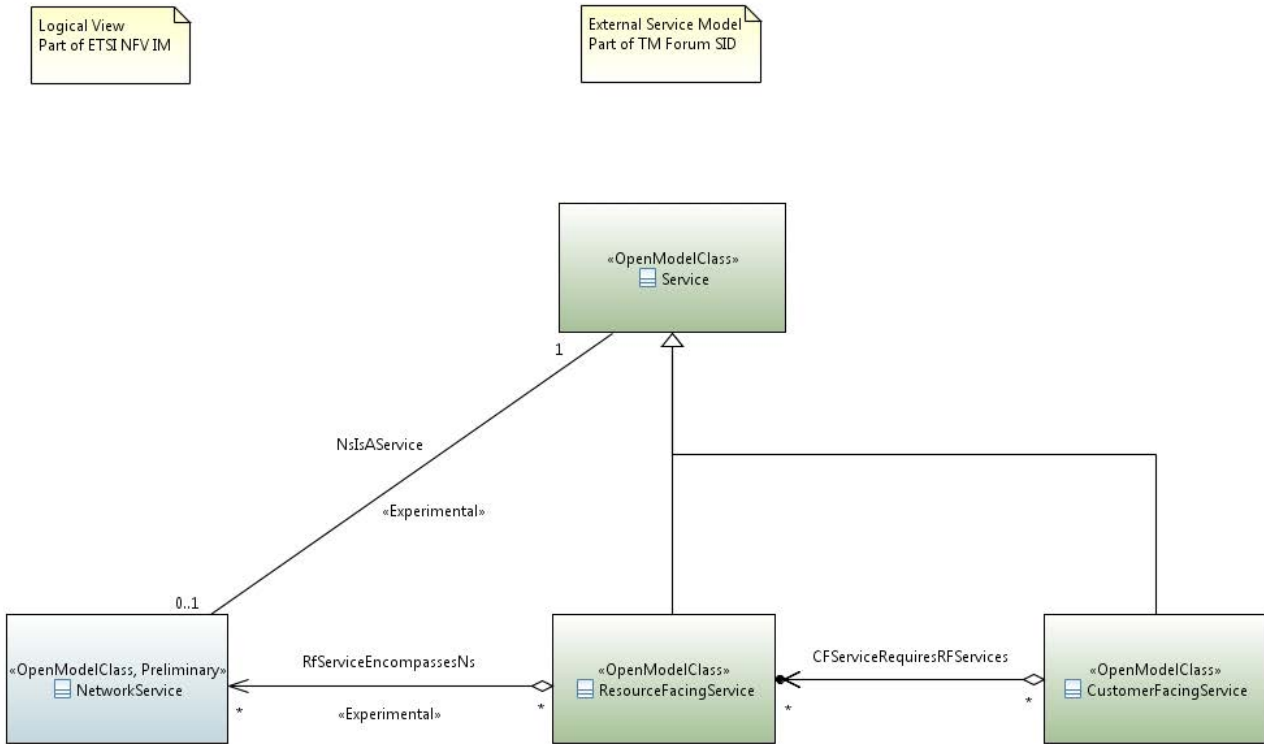

Figure 5.2.1-1: Touchpoints between NFV Information Model and External Service Model

### 5.2.2 Touchpoints with TM Forum Resource Model

For the current release of the NFV Information Model, the external Resource Model is provided as a subset of the TM Forum Informational Framework [SID] [i.3] Resource Model.

The needed classes are defined in the External Resource Model and are outside of ETSI NFV scope.

Figure 5.2.2-1 shows the touchpoints between the NFV Information Model and the External Resource Model.

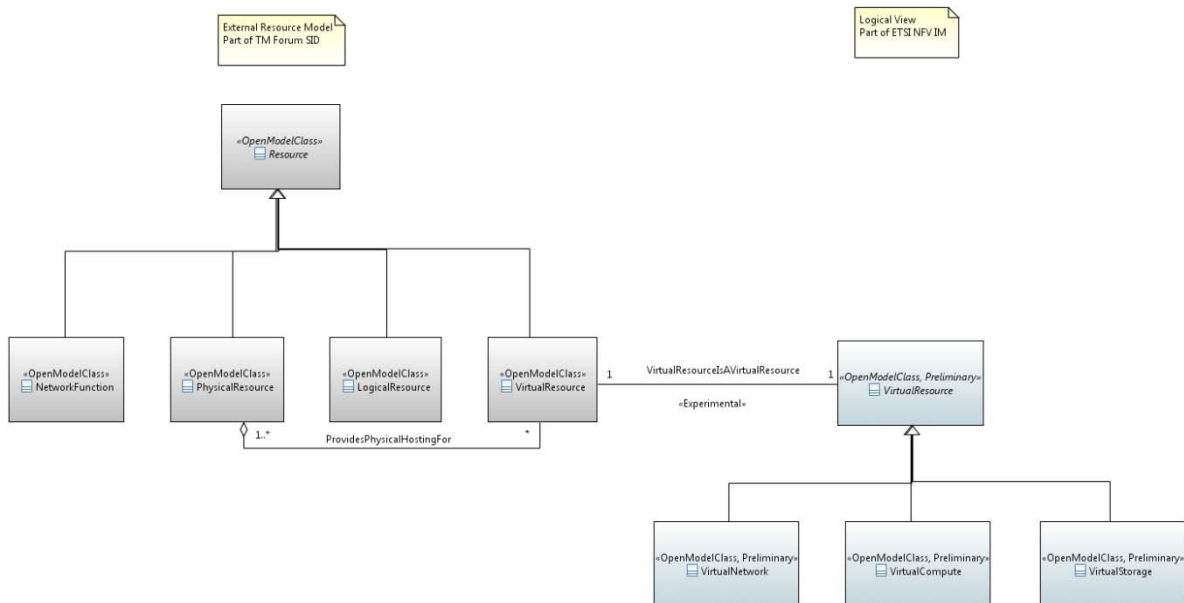

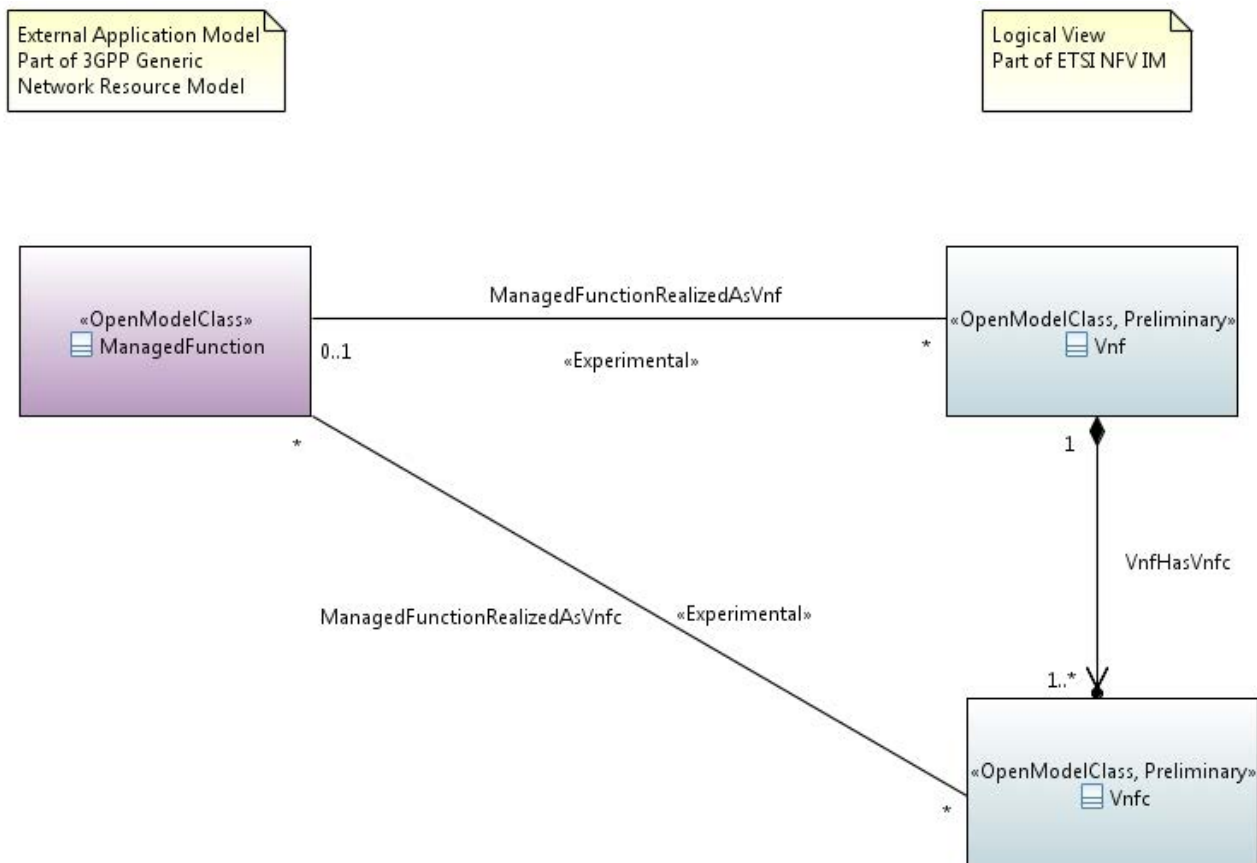

Figure 5.2.2-1: Touchpoints between NFV Information Model and External Resource Model

## 5.3 Touchpoints with 3GPP Generic Network Resource Model

For the current release of the NFV Information Model, the external Application Model is provided as a subset of the 3GPP Generic Network Resource Model [i.5].

The needed classes are defined in the External Application Model and are outside of ETSI NFV scope.

Figure 5.3-1 shows the touchpoints between the NFV Information Model and the External Application Model.

**Figure 5.3-1: Touchpoints between NFV Information Model and External Application Model**

---

## Annex A: NFV Touchpoint model

The NFV Touchpoint model built using the Papyrus UML tool is contained in a compressed file named NfvTouchpointModelv211.zip contained in archive gr\_nfv-ifa024v020101p0.zip which accompanies the present document.

---

## Annex B:

# Word format presentation of the NFV Touchpoint model

The Word format presentation of the NFV Touchpoint model is generated from the NFV UML Touchpoint Information model using the tool Gendoc available at [i.2]. The format is provided to assist the reader that do not use UML or have no access to UML tools.

The Word format presentation of the NFV Touchpoint model is a file NfvTouchpointModelv211.docx contained in gr\_nfv-ifa024v020101p0.zip which accompanies the present document.

---

## Annex C: Authors & contributors

The following people have contributed to the present document:

**Rapporteur:**

Marc Flauw, Hewlett-Packard Enterprise

**Other contributors:**

Anatoly Andrianov, Nokia Networks

Bruno Chatras, ORANGE

Nigel Davis, Ciena

Dmytro Gassanov, NetCracker

Janusz Pieczerak, ORANGE
