

STF 577: TD-LTE Phase 5

Status Report

Document History

- 2020-05-08: Document submitted for MTS#80 / MTS-TDL#4
- 2020-01-24: Document submitted for MTS-TDL#3
- 2020-01-24: Document submitted for MTS#79

From the Terms of Reference...

TDL Phase 5: Objectives

- Adaptation and extension of TDL addressing CRs
 - new features (inheritance, dependencies, test data)
 - updates to relevant parts, mapping new features to TTCN-3
- Update of TOP tools
 - resolve CRs, catch up with Eclipse updates, adaptations to TDL
- Update of technical report
 - validation, user guidelines

TDL Phase 5: Deliverables

Deliv.	Work Item code Standard number	Working title Scope
D1*	RES/ES 203 119-1 V1.5.1	Methods for Testing and Specification (MTS); The Test Description Language (TDL); Part 1: Abstract Syntax and Associated Semantics
D2*	RES/ES 203 119-2 V1.4.1	Methods for Testing and Specification (MTS); The Test Description Language (TDL); Part 2: Graphical Syntax
D3*	RES/ES 203 119-3 V1.4.1	Methods for Testing and Specification (MTS); The Test Description Language (TDL); Part 3: Exchange Format
D4*	RES/ES 203 119-4 V1.4.1	Methods for Testing and Specification (MTS); The Test Description Language (TDL); Part 4: Structured Test Objective Specification (Extension)
D5*	RES/ES 203 119-6 V1.2.1	Methods for Testing and Specification (MTS); The Test Description Language (TDL); Part 6: Mapping to TTCN-3
D6*	RES/ES 203 119-7 V1.2.1	Methods for Testing and Specification (MTS); The Test Description Language (TDL); Part 7: Extended Test Configurations
D7	RTS/TR 103 119 V1.2.1	Methods for Testing and Specification (MTS); The Test Description Language (TDL); Reference Implementation and User Guidelines

* Work items of the TDL standard series which are not affected by CRs will not be updated.

Today

- Work plan
- TDL evolution
- TOP maintenance
- Future of TDL

Status Update

Work Plan

- Timescale: Oct, 2019 (+0.5 months) - Oct, 2020 (+4 months)
 - delays with start due to administrative overhead
 - closing date adjusted for UCAAT 2020, other milestones not affected
 - work remotely, meet in person only if necessary
 - coordinated remote sessions scheduled as needed, based on availability
- Working sessions
 - WK05: Jan 30-31 Session 1 @ ETSI (2 days)
 - WK18: Apr 27-30 Focus Week @ Home (4 days)

Milestones (Current Planning)

N	Task / Milestone / Deliverable	ToR Targets	Current Targets
M0	Start of work	16-Sep-2019	Oct-2019
T0	Project Management	16-Sep-2019–30-Jun-2020	Oct-2019–Oct-2020
T1	Evolution of TDL	16-Sep-2019–31-May-2020	Oct-2019–May-2020
T2	TOP Maintenance and Enhancements	16-Sep-2019–31-May-2020	Oct-2019–May-2020
T3	Validation and User Guidelines	01-Dec-2019–31-May-2020	Dec-2019–May-2020
M1	Stable drafts (MTS#79)	15-Jan-2020	Jan-2020
M2	Final drafts (MTS#80)	15-May-2020	May-2020
M3	Deliverables approved & published, STF closed	30-Jun-2020	Jun-2020
M4*	Dissemination during UCATT 2020, STF closed		Oct-2020

* Milestones were refined during the preparatory meeting, M4 was added to extend the STF period

Overall Timeline (Current)

Task Milest.	Description	S	O	N	D	J	F	M	A	M	J	J	A	S	O	N	D
T0	Project Management																
T1	Evolution of TDL																
T2	TOP Maintenance																
T3	Validation and Guidelines																
M0	Start of work																
M1	Stable drafts (MTS#79)																
M2	Final drafts (MTS#80)																
M3	Publication																
M4	Dissemination, closing																

TDL Evolution

Evolution of TDL

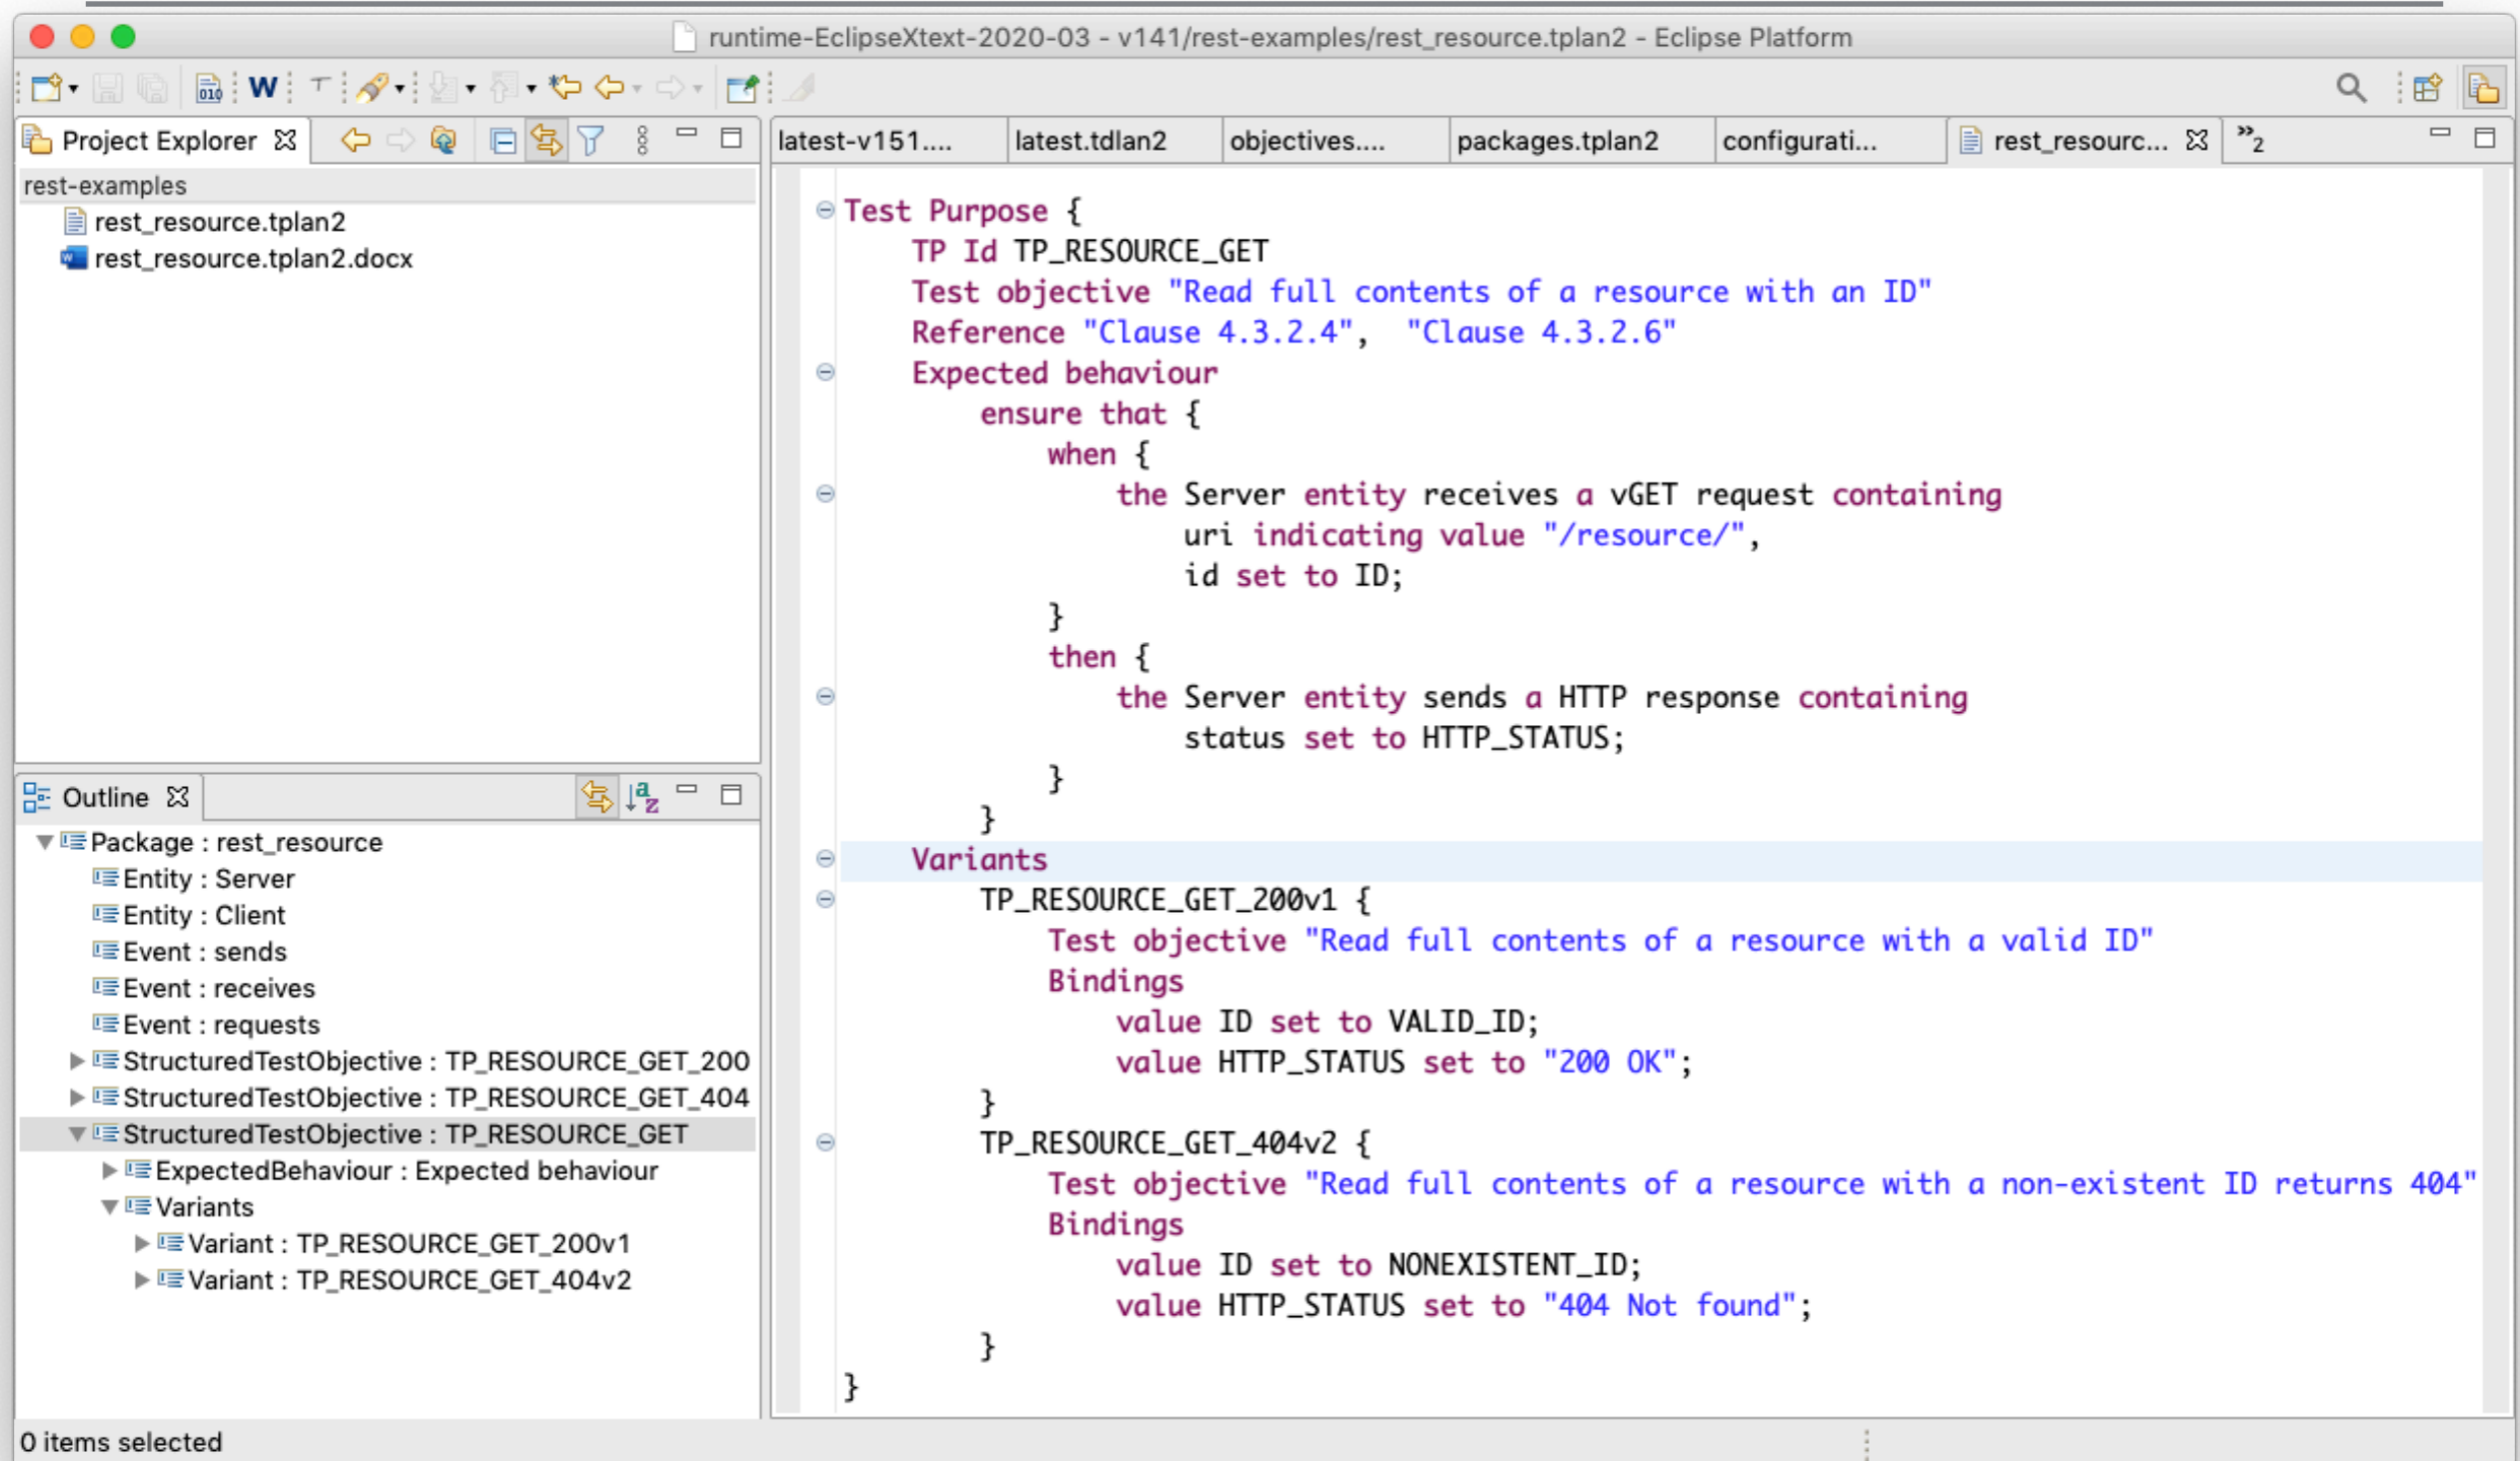

- Finalised proposals implemented for
 - inheritance support
 - separation of globally ordered and locally ordered test descriptions
 - test data specification - no change, examples and guide in TR
 - dependency specification - no major changes, predefined annotation
 - TR update, resolution of open CRs, general fixes and refinements
- New CRs submitted based on user feedback and other sources
- Drafts uploaded: May 11, TR expected May 14

TOP Maintenance

TOP Status

- Maintenance
 - support newer Eclipse version (2019-12), Sirius, Xtext, etc.
 - organise and resolve issues in BugZilla (2 open, 4 pending, 6 resolved)
 - alignment with new features, fixes and refinements
 - **TOP-first**: variants extension for TDL-TO preview (from roadmap)
- Standard data type library provided as resource
 - basic syntax support
 - needs to be manually imported still

TDL-TO Variants Preview

The screenshot displays the Eclipse IDE interface. The top toolbar includes standard editing and navigation icons. The Project Explorer on the left shows a project named 'rest-examples' containing files 'rest_resource.tplan2' and 'rest_resource.tplan2.docx'. The Outline view below it shows a package 'rest_resource' with entities 'Server' and 'Client', events 'sends', 'receives', and 'requests', and structured test objectives 'TP_RESOURCE_GET_200', 'TP_RESOURCE_GET_404', and 'TP_RESOURCE_GET'. The 'TP_RESOURCE_GET' objective is expanded to show its 'ExpectedBehaviour' and 'Variants'.

```
Test Purpose {
  TP Id TP_RESOURCE_GET
  Test objective "Read full contents of a resource with an ID"
  Reference "Clause 4.3.2.4", "Clause 4.3.2.6"
  Expected behaviour
    ensure that {
      when {
        the Server entity receives a vGET request containing
        uri indicating value "/resource/",
        id set to ID;
      }
      then {
        the Server entity sends a HTTP response containing
        status set to HTTP_STATUS;
      }
    }
}

Variants
TP_RESOURCE_GET_200v1 {
  Test objective "Read full contents of a resource with a valid ID"
  Bindings
    value ID set to VALID_ID;
    value HTTP_STATUS set to "200 OK";
}
TP_RESOURCE_GET_404v2 {
  Test objective "Read full contents of a resource with a non-existent ID returns 404"
  Bindings
    value ID set to NONEXISTENT_ID;
    value HTTP_STATUS set to "404 Not found";
}
}
```

TDL-TO Variants Preview

The screenshot shows a Microsoft Word document titled "rest_resource.tplan2.docx" in Compatibility Mode. The document contains a table with the following structure:

TP Id	TP_RESOURCE_GET
Test Objective	Read full contents of a resource with an ID
Reference	Clause 4.3.2.4 Clause 4.3.2.6
Expected Behaviour	
<pre>ensure that { when { the Server receives a vGET request containing uri indicating value "/resource/", id set to ID } then { the Server sends a HTTP response containing status set to HTTP_STATUS } }</pre>	

Below the table, there is a plus sign icon and a smaller table with the following data:

TP Id	Description	ID	HTTP_STATUS
TP_RESOURCE_GET_200v1	"Read full contents of a resource with a valid ID"	VALID_ID	"200 OK"
TP_RESOURCE_GET_404v2	"Read full contents of a resource with a non-existent ID returns 404"	NONEXISTENT_ID	"404 Not found"

Future

TDL and TOP Evolution

- Maintenance and extensions
 - REST API specification and testing needs
 - OpenAPI integration, language extensions
 - Workflow from TO to TD to executable tests
 - Capturing and managing requirements?
- Textual syntax refinements (normative)
 - indentation-based syntax? full coverage vs lean essentials?
- Adaptive / AI testing requirements (for subsequent activities)

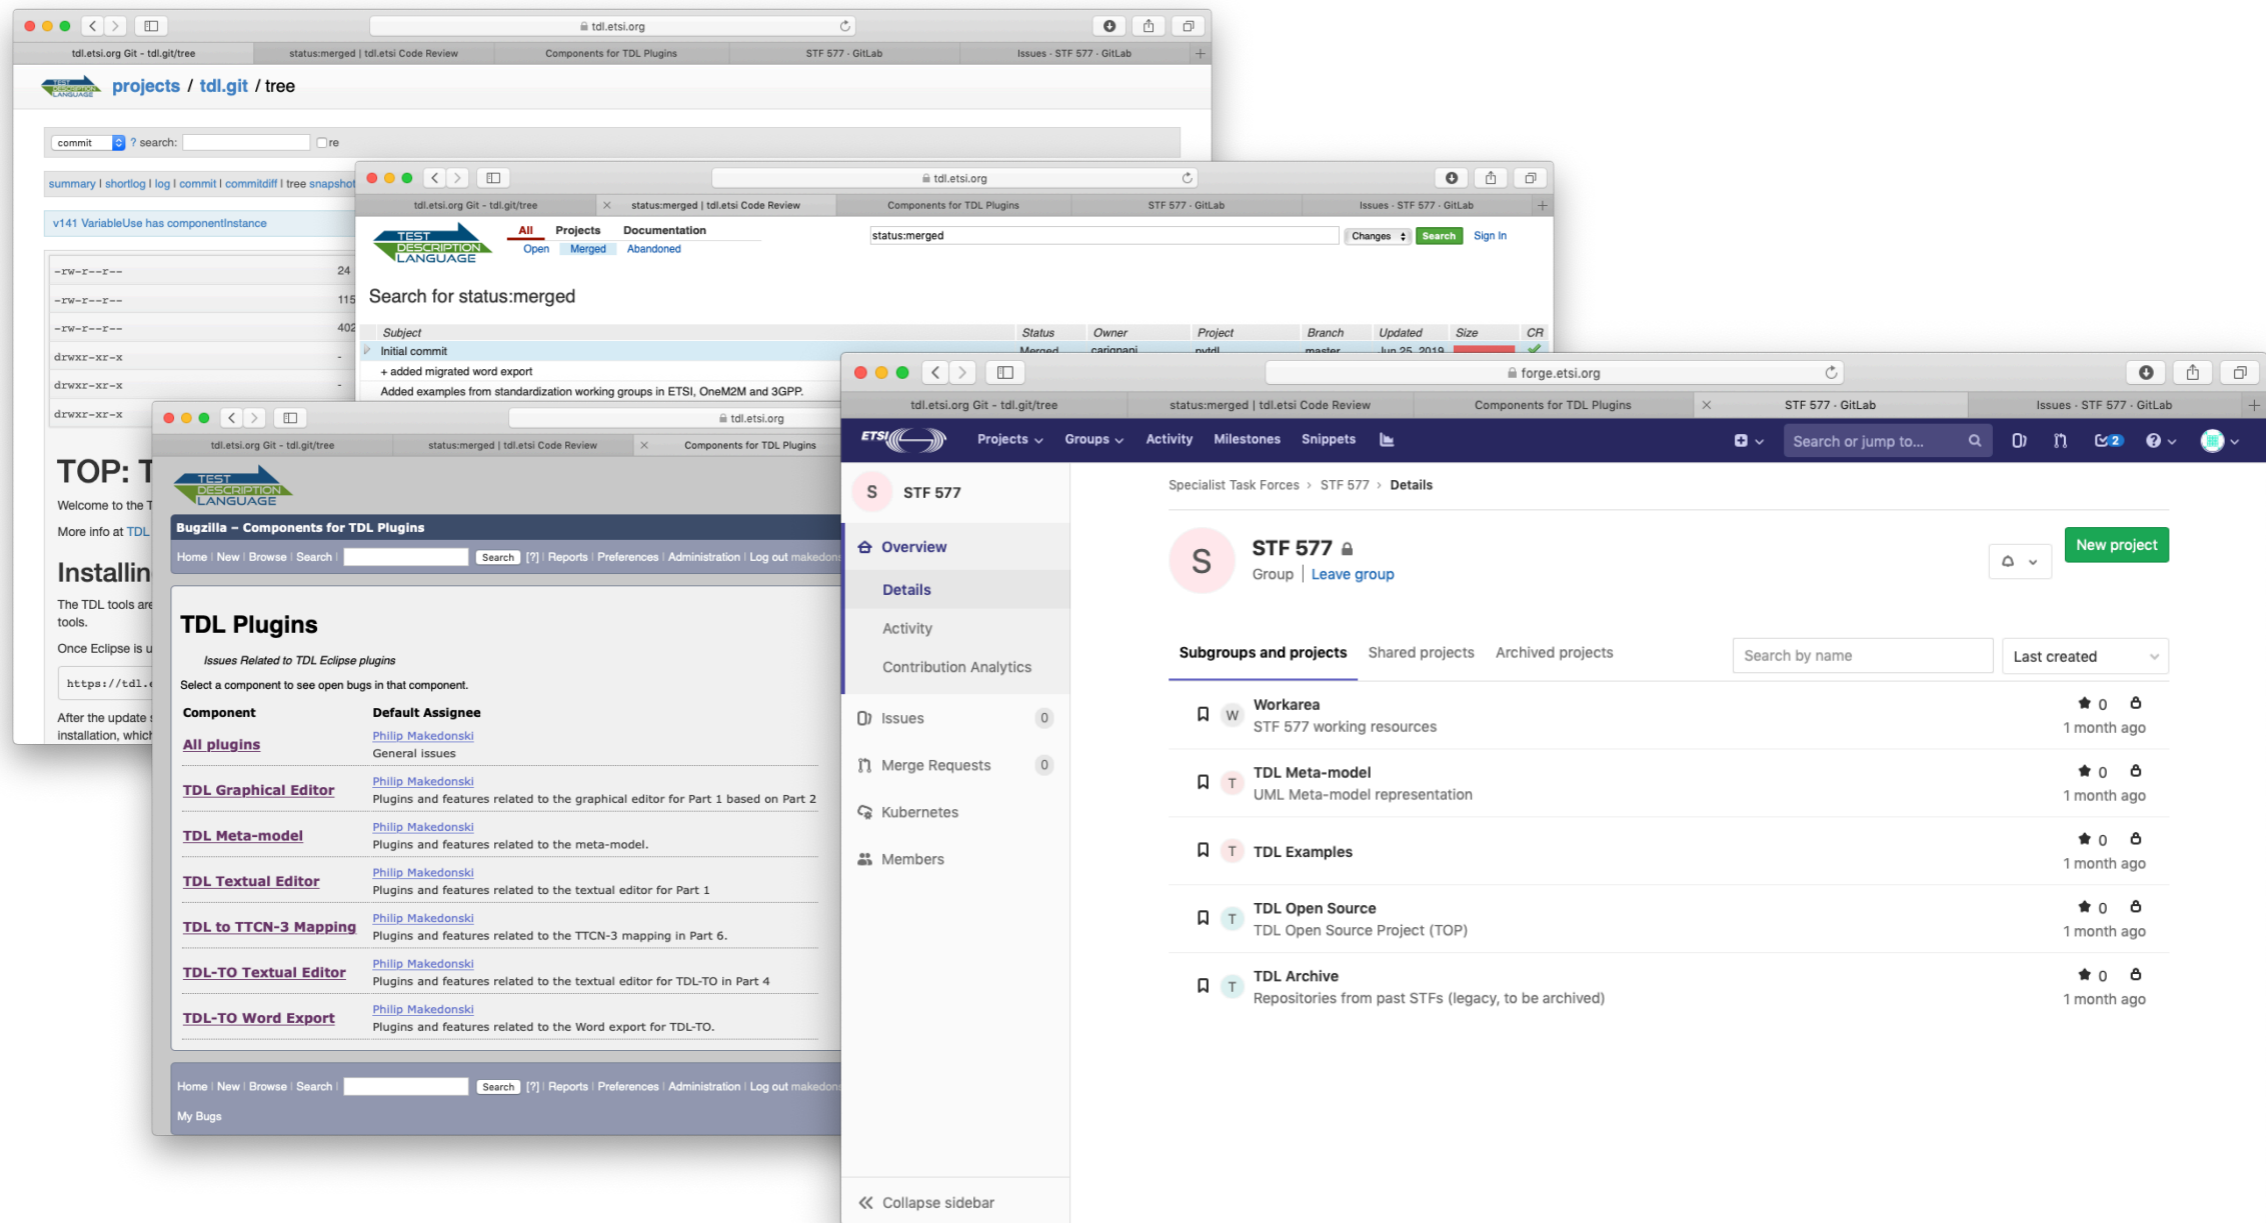

New Initiatives

- Extension for TO to capture TDs that are used in most documents
 - alternatively a separate extension
- Integration and cooperation with NWM group
 - embed TDL fragments / objects into deliverables
- Capture ICSs and requirements classification within TDL
 - currently annotations can be used for this purpose
 - guidelines shall include reference examples how to achieve that
 - check tools that can provide an insight how to express and integrate that

New Platform

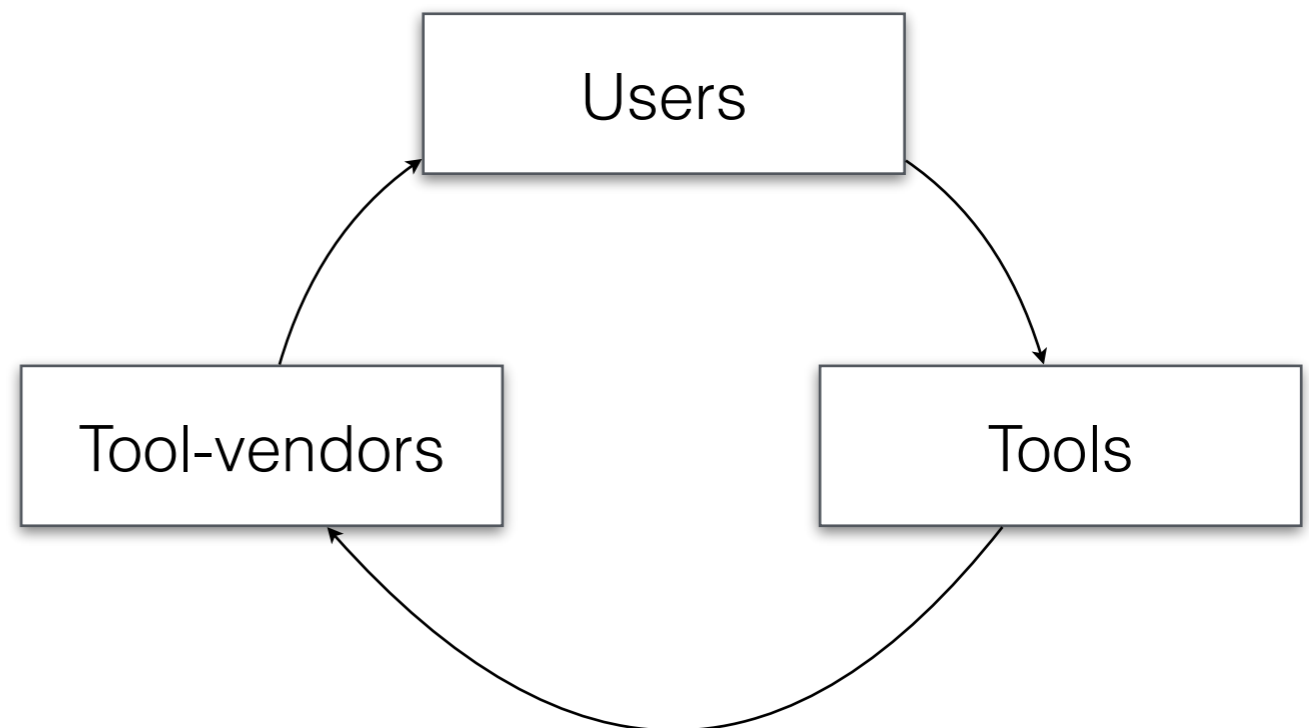

- Switch TOP to GitLab as single, modern platform
 - ETSI forge focused on deliverables only
 - ETSI labs may provide more visibility
 - Separate domain (top.etsi.org) may be lost -> redirection? landing page?
 - Ongoing discussion within ETSI
- Currently STF 577 GitLab space used as a pilot / sandbox
 - all repositories migrated, bugzilla migration pending
 - target STF contributions, mirrored to top.etsi.org once stable

New Platform

Reflections

- We need users
 - initial studies and some interest at ETSI
 - other parties: NetResults, TSP, U-Ottawa, McGill U
- Users need tools and **guides**
 - TOP can be a platform for both
- Tools need tool-vendors
 - TOP as a starting point
- Tool-vendors need users

Reflections

- Further refinements and extensions desirable
 - inheritance, data and typing, local behaviour, mapping to TTCN-3
 - secondary, need to come from actual users
- Main focus on increasing acceptance and adoption
 - identify limiting factors and act on them, requires faster turnaround
 - information and training on solving actual problems instead of on features
- Fostering initiative among stakeholders
- Support and funding opportunities

Any other business?
