Open Meeting of the Network and Information Security Steering Group (NISSG)
28th June 2006, Brussels

Purpose of the Open Meeting

The NISSG was created in 2004 by the ICT Standards Board to provide a strategic view at European level of standardization issues in relation to Information and Communication Technologies (ICT) network and information security.

Its main current project is the production of an updated version of an existing report on Network and Information Security standards which was produced by CEN and ETSI in response to COM(2001) 298 final (report available as ETSI SR 002 298).

The aim and purpose of this open meeting is to provide an opportunity for a public consultation on the requirements for future standardisation developments which have to be addressed by this updated version.

Venue

CEN/CENELEC Meeting Centre - Meeting Room Galileo
Rue de Stassart, 35
B-1050 Brussels

Participation is free but seats are limited. Attendance has to be notified before 20 June 2006 to nancy.walker@cenorm.be who will confirm your reservation.

Information on Venue, Hotels etc: see
http://www.cenorm.be/cenorm/aboutus/information/visiting+us/index.asp

Draft Report

The draft report is currently still being worked upon. A print-out will be included in the delegates package as back-ground to the Project Team's presentations.
