

Cybersecurity Act – Establishing the link between Standardization and Certification

13 February 2018, Brussels - Marriott Hotel

WHY

Cybersecurity Certification – Contribution opportunities and Challenges for the European Standardization Organizations

The proposed EU Regulation called the 'European Cybersecurity Act', establishes a European Cybersecurity Certification Framework for ICT products and services. It specifies the essential functions and tasks of the European Union Agency for Network and Information Security (ENISA) in the field of cybersecurity certification.

This Act raises a number of questions regarding the standards needed to support such certification framework and the role of the different cybersecurity stakeholders.

WHAT

The conference will present the cybersecurity certification landscape and unveil what it means for policy makers, industry, citizens, certification bodies, and the European Standardization System.

At the end of the day, attendees will have a clearer view about the legislative landscape and the path forward for standards to support the cybersecurity certification framework.

FOR WHOM

The conference aims to foster the dialogue among policy makers, industry, standardization organizations, certification bodies and those involved in the development of the ICT certification framework in Europe, in view of an effective implementation of the 'EU Cybersecurity Act' upon its adoption.

WHEN - WHERE

Tuesday 13 February 2018 in the Hotel Marriott Grand Place - Rue Auguste Orts 3-7, 1000 Brussels

CONTACT

- ENISA: [Sławomir Górniak](#)
- CEN and CENELEC: [Alina Iatan](#)
- ETSI: [Sonia Compans](#)

PROGRAMME

9:00 – 9:30	REGISTRATION AND COFFEE
	Moderator: Jacki DAVIES
9:30-9.45	WELCOME <ul style="list-style-type: none">▪ Bernhard THIES, CENELEC President▪ Luis Jorge ROMERO, Director General of ETSI▪ Steve PURSER, Head of Core Operations Department, ENISA - European Union Agency for Network and Information Security
9.45-12.30	EUROPEAN CYBERSECURITY ACT: how to increase trust in ICT products and services placed in the European market? <p>Presentation on the European Cybersecurity Act followed by a discussion on the impact of the Act on EU security and privacy.</p> <p>Members of the panel:</p> <ul style="list-style-type: none">▪ Jakub BORATYNSKI, Head of Unit, DG CONNECT H1 - Cybersecurity and data protection, European Commission▪ Hugo CORDOVA GONZALEZ-CASTILLO, Policy Officer, European Parliament▪ Alberto MAZZOLA, Member of the European Economic and Social Committee▪ Steve PURSER, Head of Core Operations Department, ENISA▪ Cinzia MISSIROLI, Director, Standardization and Digital Solutions, CEN-CENELEC Management Centre▪ Luis Jorge ROMERO, Director General of ETSI
