

The Standards People

# ETSI Research Conference 2023

Maximizing the Impact of European 6G  
Research through Standardization

## Session 10: Recommendations & Conclusions

Presented by:

- **Rui L. Aguiar**, Steering Board Chair, NetworkEurope
- **Bernard Barani**, Deputy Head of Unit, DG CONNECT, European Commission
- **Diego Lopez**, ETSI ISG PDL Chair, ETSI ISG NFV NOC Chair
- **David Boswarthick**, Director NET, ETSI

08/02/2023

# ETSI Research Conference 2023 Recommendations

Recommendations  
to  
EC Projects

Recommendations  
to  
Researchers

Recommendations  
to  
Standards Groups

## Recommendations to EC Projects

Anticipate **proactively** the 6G standardisation opening, probably 2025, in 3GPP Release 20 and beyond.

Check project standardisation objectives against the ITU IMT2030 Vision and complement/adjust as appropriate (e.g. KVI's).

Ensure SNS project cooperation using appropriate Working Groups for pre-standardization preparation.

Engage with Standards groups early (rather than late),  
And engage with the widest possible EU stakeholder community.

# ETSI Research Conference 2023 Recommendations

## Recommendations to Researchers

Ground your ideas on the existing State-Of-The-Art of standards (planning) – it is not a waste of time.

Establish close links with standardization oriented professionals – you can learn as much from them as from traditional researchers.

Make sure you select your standards – some are easier to provide outcome than others. Or better stated: set your personal objectives, and engage with the standards body that will be easier for those.

Explore existing mechanisms for driving your innovations into society – including standards impact.

# ETSI Research Conference 2023 Recommendations

## Recommendations to Standards Groups

Provide up to date roadmaps on research result expectations and share with research communities.

Facilitate reporting of research results, as well as feedback to researchers.

Support links to research results: experiments, reference implementations, connections to open-source.

Seek the formal academic recognition of standards contributions.

# In Summary

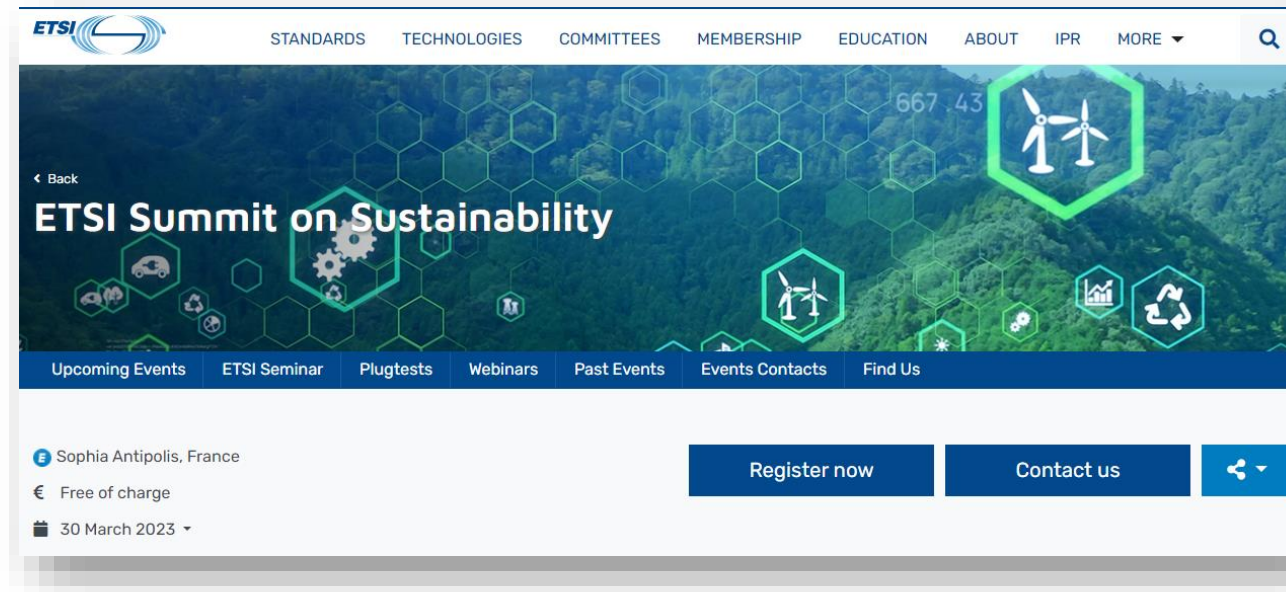

ETSI is here to welcome research and researchers into standardization.  
For any questions simply contact us at [research@etsi.org](mailto:research@etsi.org)

Follow the latest research information on <https://www.etsi.org/research>  
Subscribe to [research\\_info@list.etsi.org](mailto:research_info@list.etsi.org) to join the ETSI research community

See you in EuCNC Gothenburg 6-9 June 2023 <https://www.eucnc.eu/>  
Participate in the Standards Session with EC / 6G-IA / ETSI

ETSI thanks the Programme Committee, the speakers, the participants and the event organizers. We hope to welcome you again at a future ETSI event.

# ETSI Summit on Sustainability 30<sup>th</sup> March 2023

## **EVENT INFO: ETSI – ETSI Summit on Sustainability**

The one day summit will examine the “role of ICT in sustainability”.

Share insights on how ICT can help save energy, and reduce waste both for its own industry as well as supporting similar evolutions in other industry sectors.

What are the principal enabling technologies? Deep dive on some of the key technology and standardization activities supporting Green initiatives that are conducted by the ETSI Technical groups as well as 3GPP and oneM2M.

What are the gaps and pending actions to further address sustainability in standardization? Help identify and participate in the debate on new development areas and opportunities for ETSI and its partners.

**Thanks for your participation**

**Safe Travels Home...**
