

IoT Conference 2023

CyberPass Demo: Streamlining Cybersecurity Assessments with ETSI EN 303 645 for Connected Products

Presented by:

TRUST ISSUES HACKERS INSECURE SECURITY PROBLEMS 125 Bn+ of lot Devices 2030

Challenges

Complexity of managing cybersecurity levels over time

62% of attacks exploit customers' trust in their suppliers.

50%+ are vulnerable

MISSION Bringing Trust to the Internet of Things

Our Services

SECURITY CONSULTING

- Risk Assessment
- Secure Design
- Certification Schemes
- Strategic plan

SECURITY EVALUATION

- Pentesting
- Regulations
- Standards
- Certification

SECURITY INNOVATION

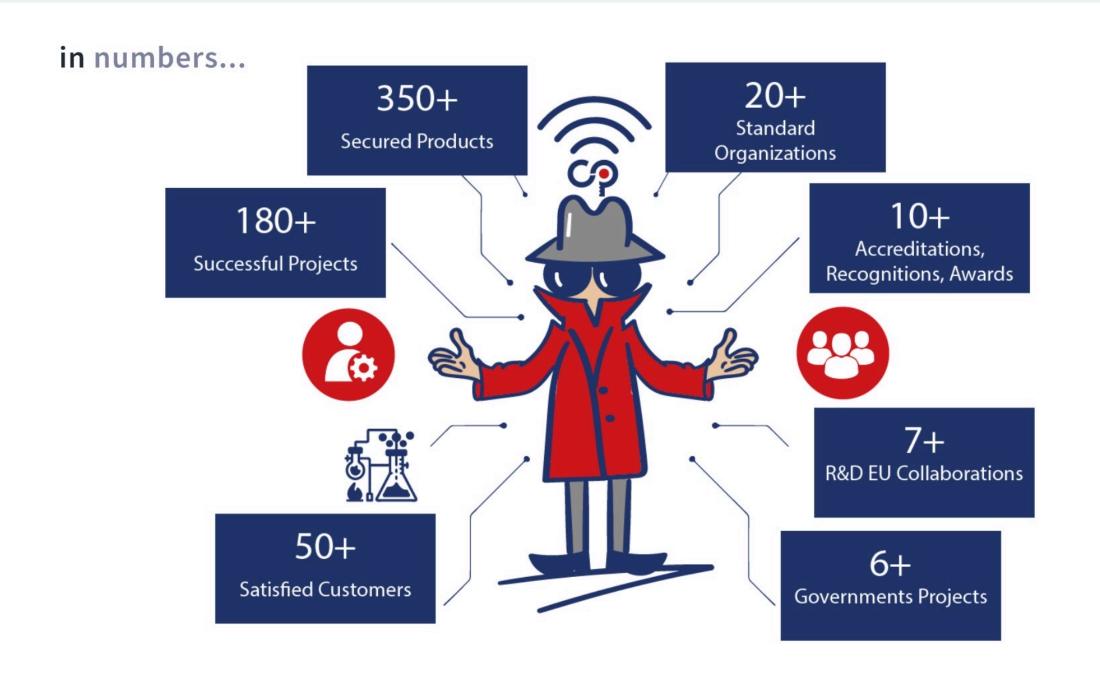

- Risk Analysis
- Product Assessment
- Trusted Procurement
- Vulnerability Management

SECURITY TRAINING

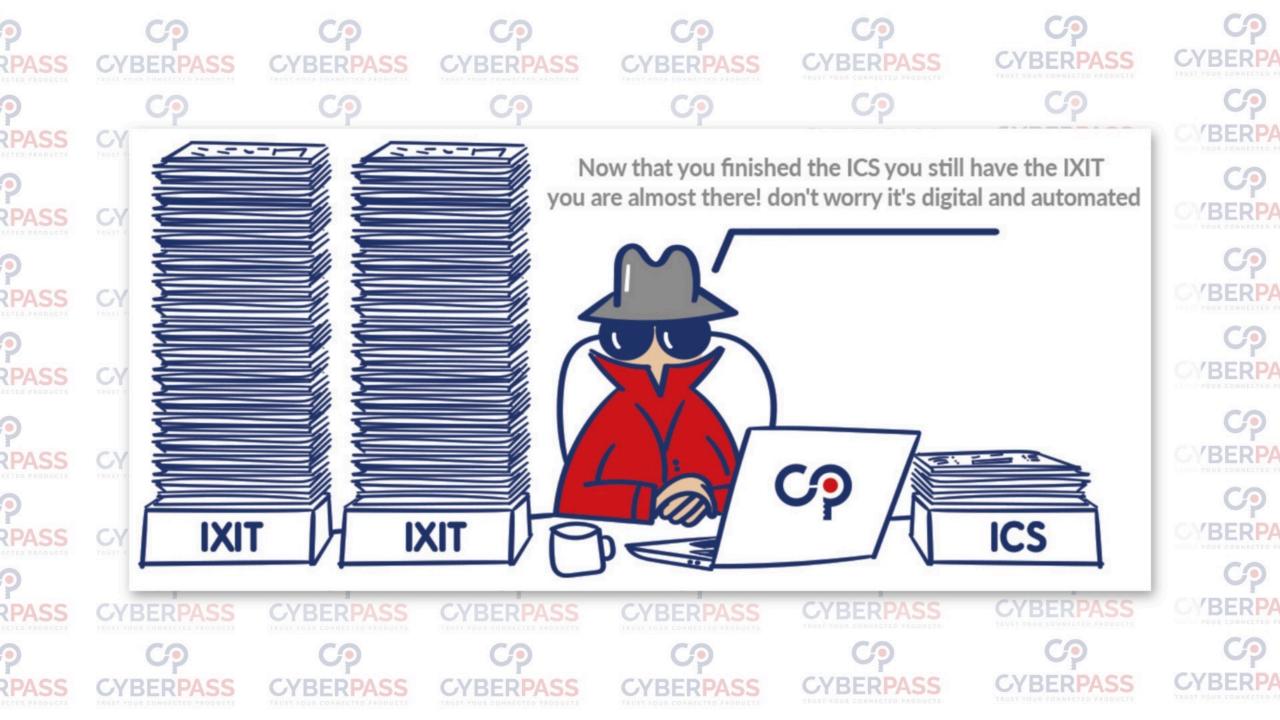

- Cybersecurity Act
- Certification Schemes
- Common Criteria
- IoT Cybersecurity
- Cyber Resillience Act

The Solution

CYBERPASS provides enterprises with a costeffective and scalable solution to assess and manage the level of cybersecurity of their connected products provided by third-party suppliers.

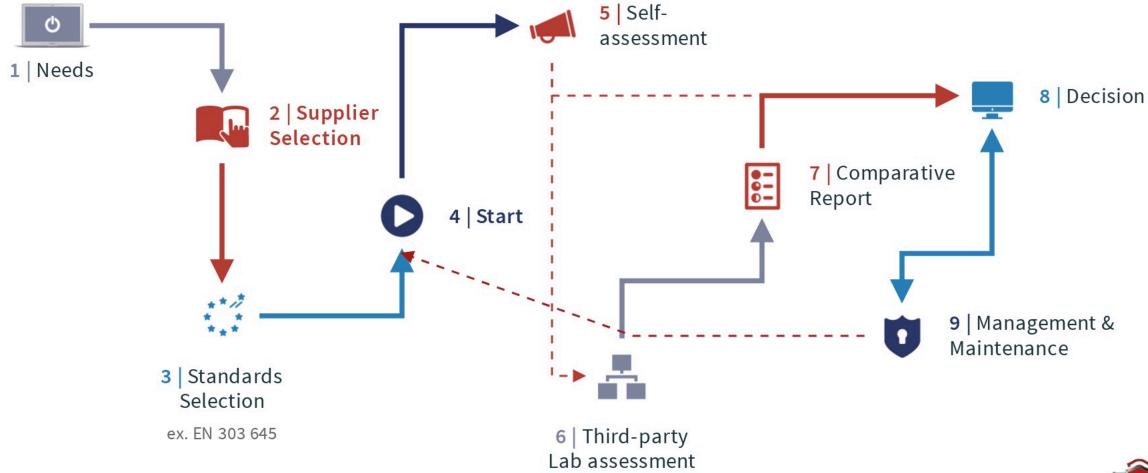

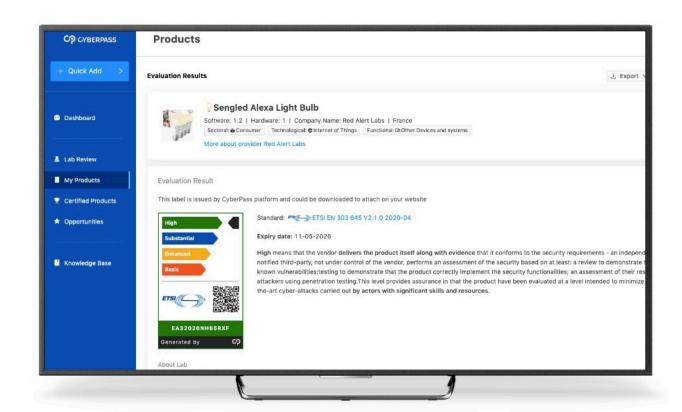

How it works?

What Benefits!?

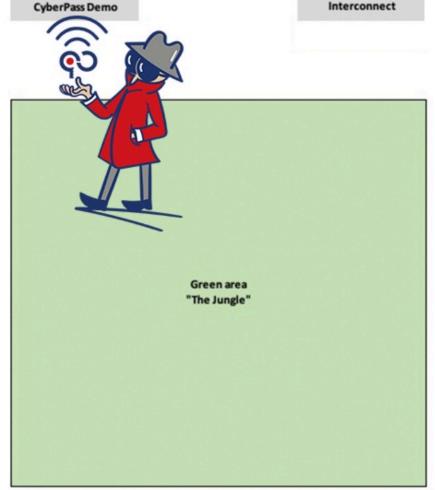

- **✔** Cost-effective & Scalable
- ✓ Intuitive & User-Friendly
- **✓** Speed & Efficiency
- **✓** Engagement & Trust
- ✓ Labelling & Certification

Project Impacts

Digital | Economic | Societal | Environmental | Sovereignty

Fostering cyber assessments in a quantifiable, transparent and recognized way across the EU (trusted accredited labs)

Improving collective cybersecurity resilience

Reduced risk of cyberattacks on critical sectors (eg Health)

Pooling of French and European standards

Accelerating the adoption of connected technologies

Establishment of an ecosystem of trust

Reduce the dependence of France and the EU on non-European solutions;

Securing risks with significant ecological repercussions (in the field of energy, for example)

Strengthening the sharing of expertise between experts in security assessment and certification

Who can benefit from CyberPass?

Covering the whole value chain...

Manufacturers / OEMs

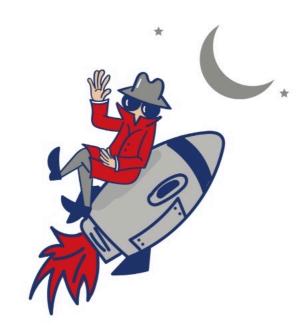

★ Freemium + purchase on the go upgrades

Business Buyers / Distributors

★ Freemium + **Subscription** Fee to upgrades.

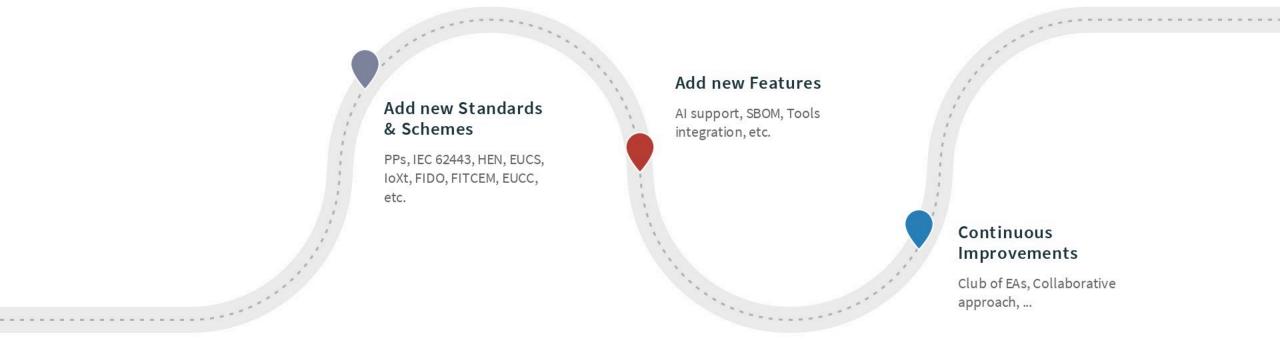

Service Providers

★ Each assessment/certification by a Service Provider will incur a % fee

What's Next?

Key Takeaway

Standards & Regulations

Use standards (ETSI 303 645) as often as possible to address cybersecurity by design and think about compliance and regulatory requirements to access new markets while minimizing your costs.

Automation

71% say their staff spends too much time on tasks that should be automated, and that number jumps to 82% among teams that say they don't have enough time for strategic tasks.

Anticipation

Even if the directives only come into force from 2025, it is important to start incorporating them now into the processes of the manufacturers.

E.g. "For devices that cannot have their software updated, the product should be isolable and the hardware replaceable."

Trust Products...

Trust products and not just their suppliers.

Take accurate decisions! Express your security needs to suppliers! Rely on third-party when necessary.
