

IoT Conference 2023

H2020 Interconnect: Delayed start of smart appliances using SAREF4ENER

Presented by: Fábio Coelho

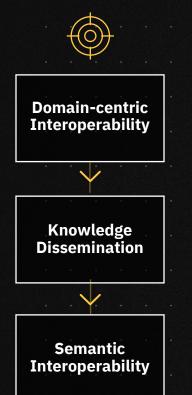

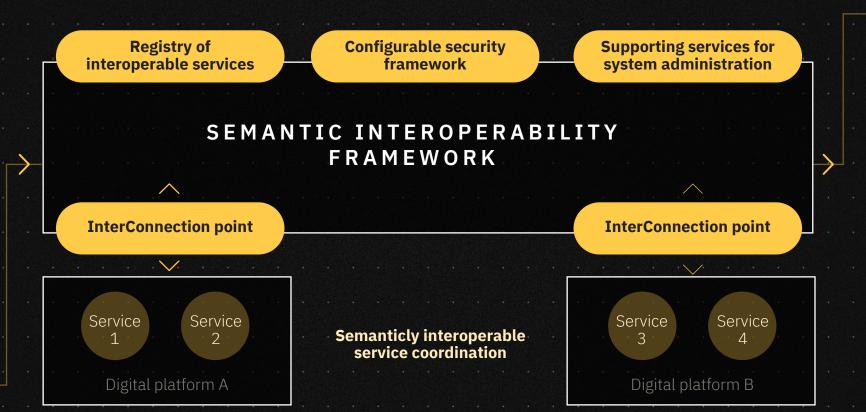

INTERCONNECT

INTEROPERABILITY FRAMEWORK

Semantic Reasoning

Knowledge-base Interactions

Decentralized and Scalable

DIGITAL PLATFORMS AND SERVICES BECOME SEMANTICLY INTEROPERABLE

Services use the interoperable tools to publish & discover capabilities and are joint together to enable use case demonstration

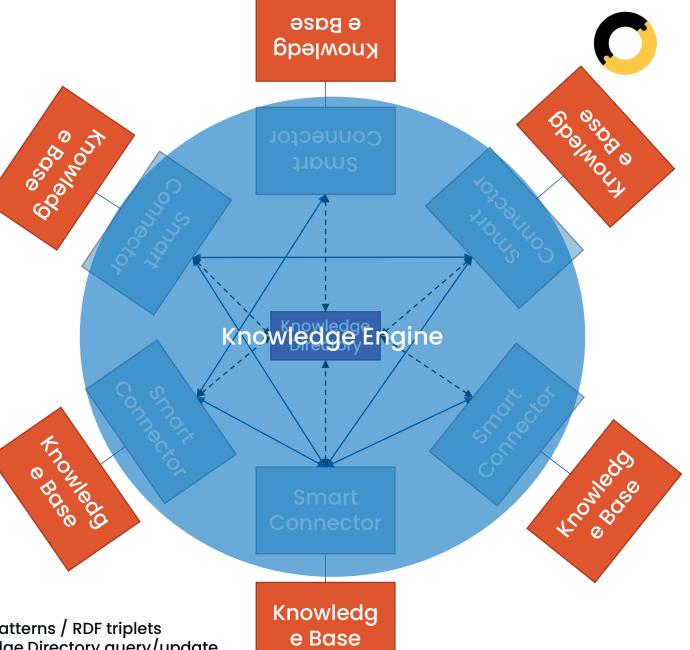

The Knowledge Engine

The Knowledge Engine is composed out of Smart Connectors and the Knowledge Directory

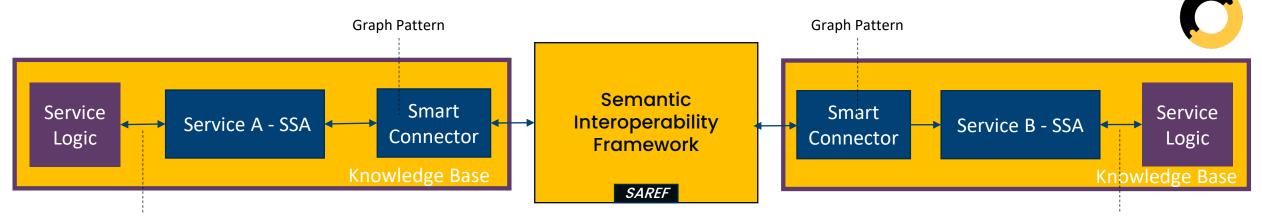

The Knowledge Base is your application

Each Knowledge Base has its own Smart Connector

The Smart Connector is a generic piece of software, that facilitates communication and reasoning

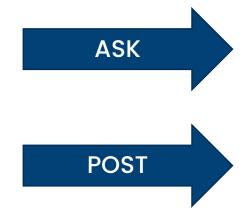

Knowledge Dissemination

Proprietary (e.g. REST API, Query API, ...)

interconnect

Use case: users allow smart appliances to offer flexibility managed by an Energy Management System

Plug & play Energy Management Service
