SAREF on the Move

Svetoslav Mihaylov
Policy Officer
Internet of Things, DG CNECT, European Commission

ETSI IoT Conference 05 July 2023

How Europe supported the SAREF evolution

- The EC funded two studies to create and enlarge SAREF for energy/smart appliances

- The EC funded several STFs to modernise and enlarge SAREF to other verticals

- The EC funded a number of Horizon Europe projects that use and contribute to SAREF in different verticals

- The EC funded the InterConnect project to push the ontology to market readiness on a large scale

European
Commission

Where do we go from here

- Wider adoption of SAREF in commercial implementations in Europe and beyond
- Initiatives in deployment-oriented programmes can be used
  - DIGITAL EUROPE programme
    - Deployment of Common European Data Spaces – Energy, Mobility, etc.
    - [DIGITAL Call dedicated to the Common European Reference Framework for energy-saving applications | Shaping Europe's digital future (europa.eu)](#)
  - Connecting Europe Facility
    - CEF Digital - Deployment of cross-border Operational Digital platform
    - CEF Energy and Mobility
  - RRFs, National plans, InvestEU, etc.
- Further evolution in EU R&I programmes and standardisation grants
  - Including demonstration that SAREF in energy can lead to

higher level of assurance in interoperability.

Thank you

European Commission
