# What do Utility customers require from AMI solutions?

- + Interoperability (standards based, iDiS, profiles,...)
- + Availability, Reliability, **Security**
- + Low TCO (HW, SW, operation & maintenance)
- + Performance (bandwidth, latency, QoS)
- + Flexibility and control (network management)
- + Exclusivity? (private network vs. public or shared?)
- + ...
- + How will M2M contribute?
