

CORD: Central Office Re-architected as a Datacenter

Extract from slides by Larry Peterson Open Networking Lab

CORD Aims to Deliver

Economies of a datacenter

Infrastructure built with a few commodity building blocks using open source software and white-box switches

Agility of a cloud provider

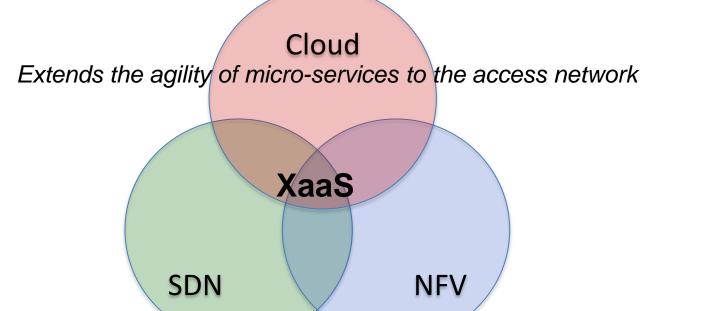

Software platforms that enable rapid creation of new services

From Access-as-a-Service to Software-as-a-Service

Design Philosophy -> Tangible Value

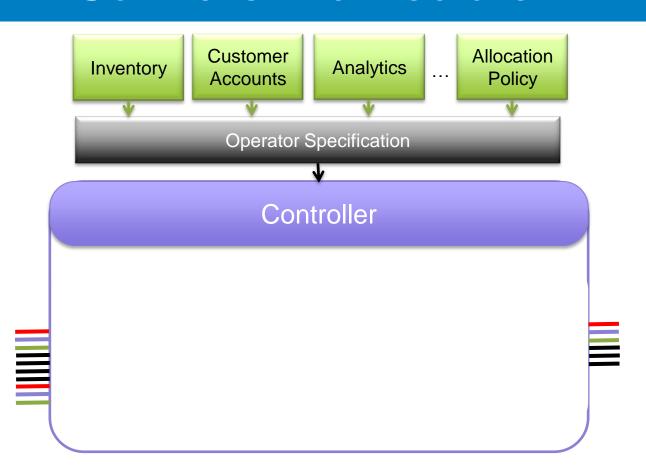

Interconnects VNFs and is a source of innovative services

Supports legacy VNFs and pushes the limits of disaggregation

CORD – Software Architecture

CORD Software Stack

Access-Subscriber-Internet-Monitoring-XOS provides the **CDN** as-a-Service as-a-Service as-a-Service as-a-Service services management and XOS NFVI orchestration platform vSG **vCDN** Ceilometer OpenStack / Docker **Fabric** Multicast **VTN vOLT** vRouter Control Control **ONOS** ONOS: carrier-grade control plane platform for SDN

ONOS Internals – Architectural Tiers

Northbound Abstraction:

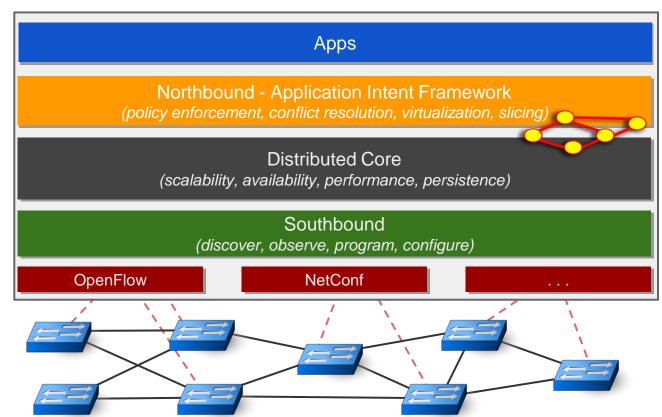

- network graph
- application intents
- virtualization & slicing

Core:

- distributed
- protocol independent

Southbound Abstraction:

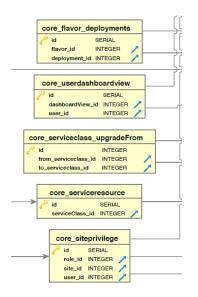

- generalized OpenFlow
- pluggable & extensible

Data Model Notes

Brief analysis by Nigel Davis

XOS Model

- Model development is organic
- □ Focus is on agile deployment of critical capability
- Model deals with
 - ■Network including slicing
 - Services
 - Users
 - □ Tenants
 - □Invoicing
 - Etc

Observations

- ON.Lab ONF combination: Ideally positioned to tackle the Standards – Open Source interaction challenge... as it is a necessity for the combination
- Over the next few months there are bound to be significant challenges as we all know how hard this is
 - □Mindset
 - □ Terminology
 - ☐ Etc (as discussed in the NSM workshop
- □ ONF already has a combined opensource-standards mindset with the Core model, tooling and Tapi so some of the hurdles are already jumped...
- ☐ There will not be one Eureka moment... this will be a long hard slog... but we are forced to tackle the challenge
