tools

Cloud & platform
technology

Secure
connectivity

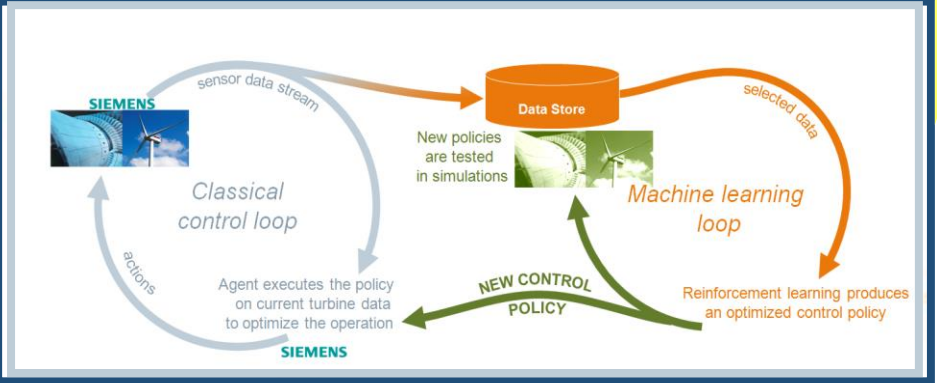

Cyber-
Security

AI is based on a portfolio of technologies that are combined to generate value

Reinforcement Learning
Learning from labeled data (actions and rewards)
Identify optimal action strategies

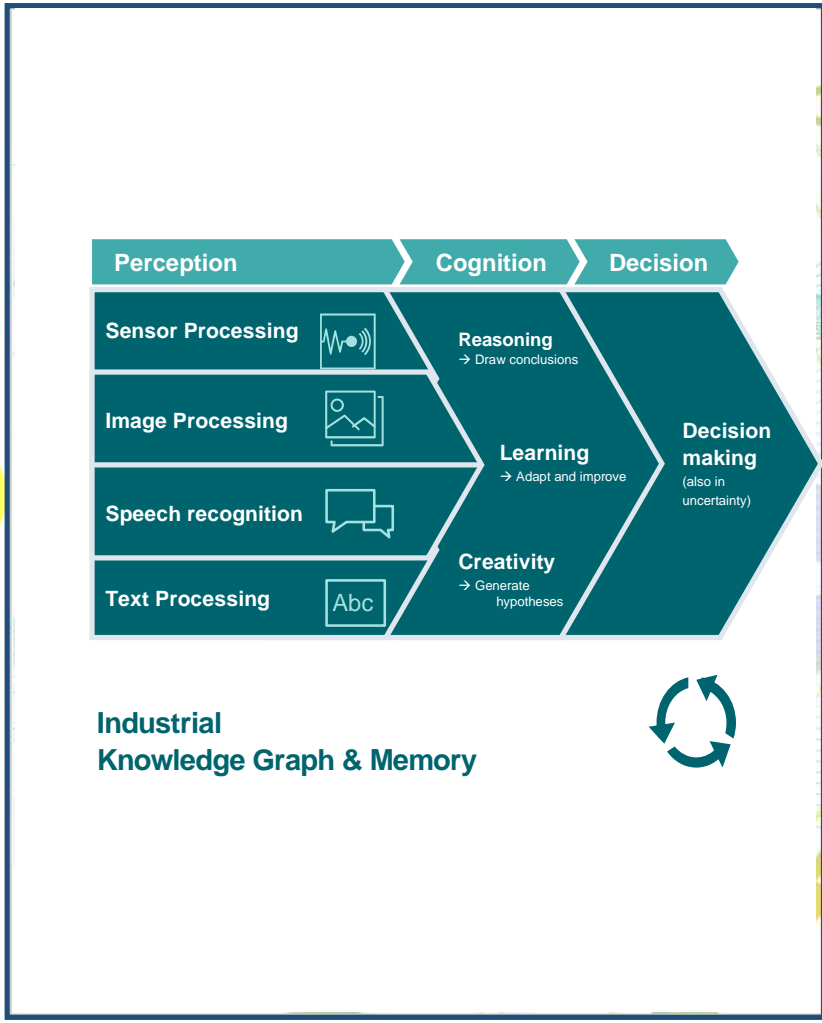

$$\max_a \sum_{t=0}^T \gamma^t r(s_t, a_t)$$

Definition

From an industrial point of view, AI means **algorithm-based and data-driven computer systems** that enhance machines and people with digital capabilities such as **perception, reasoning, learning** and even **autonomous decision making**.

Technology

Perception/Cognition/Decision/Knowledge are key elements

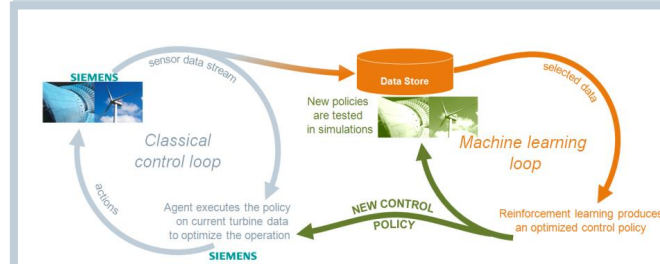

Perception

Signals and data

e.g. temperature, acceleration, pressure, force, magnetic field, ...

Cognition

Decision

Speed

Flexibility

Quality

Efficiency

Knowledge

1

Digitalization and AI

2

Industrial Examples of AI

3

Vision for an AI PPP in Europe

Our IoT operating system MindSphere – enhanced by Edge and mendix

Applications

Powerful industry solutions with advanced analytics

Open PaaS

Develop robust industrial IoT solutions faster with global scalability

Edge Management

Edge Device Management, Edge App Management, and Edge App Store

Connectivity

Connect products, plants, systems, machines and enterprise applications

Edge Apps

Applications for intelligent data use

Edge Devices

Secure, future-proof basis for running edge applications

Building a world-class ecosystem

Examples

SIEMENS

MindSphere

Partner Types

- Consulting and Strategy
- Application Developers
- System Integrators
- Technology
- Hybrid OT
- Connectivity

Edge computing – much more than a cloud gateway

Analysis and (pre-)processing
on the shop floor

Low-latency and processing
of high bandwidth data

IT/OT convergence

Data security and privacy

Siemens closes the gap!

MindSphere

Industrial Edge

Control level

Siemens Industrial Edge brings IT mechanisms into the OT world

Edge Management System

Central infrastructure to manage Edge devices

Edge Apps Edge

Applications for intelligent data use

Control level + Edge Devices

Secure, future-proof basis for running Industrial Edge applications

X-RAY ON

X-ray-based PCB quality assurance

Siemens Electronics Factory Amberg, Germany

Challenge

Production output of SMT line limited by time consuming X-ray Quality tests

Every further X-ray machine requires additional invest of €500,000

Non Production Critical Level

AI

Training of Algorithm

Continuous data storage

App Deployment/Update

Proxy

Production Critical Level

Captured Data Real time capturing of >40,000 production parameters

Peak volume of 10 MB/s

AI

PCB Quality Prediction Algorithm

X-RAY Testing necessary?
YES or **NO**

X-RAY

No X-Ray

Assembly line

Edge Device

Manufacturing Execution System

Minimization of
necessary X-ray tests
by up to

30%

Quality rate of

100%

Reduced capital
invest for further
X-ray machines of

€500,000

Magazine optimization

HELLER GmbH

Magazine
optimization

HELLER GmbH

Cycle-time reduction enabled by program focused optimization of tool magazine right at the machine
