Signatures and Seals

# elDAS, Signatures & Seals

#### Legal differences addressed by common technical solution:

Electronic signature is for *natural* persons

eIDAS Art. 3(10) "data in electronic form, which is attached to or logically associated with other data in electronic form and which is used by the signatory to sign"

- (a) uniquely linked to the signatory;
- (b) capable of identifying the signatory;
- (c) created [...] with a high level of confidence, use under his sole control; and
- (d) linked [...] in such a way that any subsequent change in the data is detectable.

Electronic seal is for *legal* persons

eIDAS Art. 3(25) "data in electronic form, which is attached to or logically associated with other data in electronic form to

ensure the latter's (electronic data) origin and integrity"

- (a) uniquely linked to the creator of the seal;
- (b) capable of identifying the creator of the seal;
- (c) created [...] with a high level of confidence under its control, use for electronic seal creation; and
- (d) linked [...] in such a way that any subsequent change in the data is detectable.

Trusted Lists

## Trusted Lists defined by eIDAS

#### eIDAS Section 3 Article 22

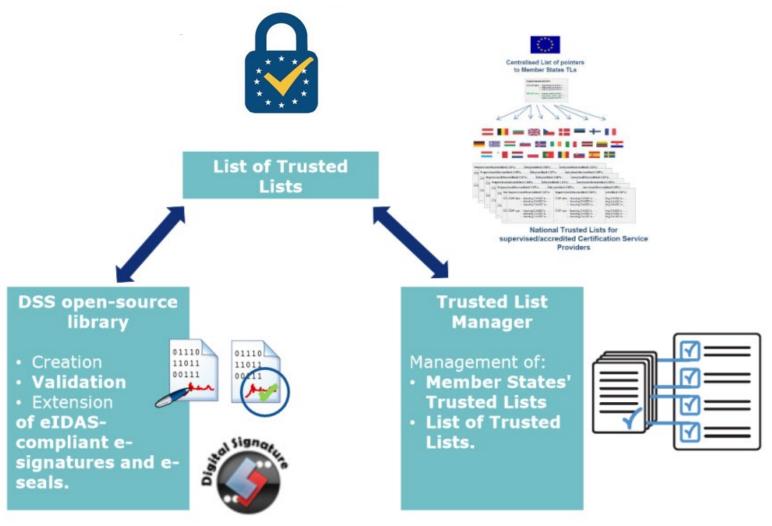

Each EU Member State has an obligation to establish, maintain and publish trusted lists, including information related to the qualified trust service providers for which they are responsible, together with information related to the qualified trust services provided by them. The lists are to be published in a secured manner, electronically signed or sealed in a form suitable for automated processing.
