３．Internet Trust and its Assessment

- **Traditional method to ensure the trustworthiness such as F2F verification does not work for application services on the Internet.**

Do you rely on review sites or online reviews?

- **To solve this problem, the services need to be assessed neutrally by a third party.**

It seems I can rely on it!

Trustworthiness Assessment for Certification Authorities and e-Contracting Services, etc.

■ **The trustworthiness assessment framework can be divided into 3 levels according to the severity of risk.**

Larger Risk

Legal Accreditation

Third Party Certification
(Certified by private assessment bodies)

Other Trust services
(NOT assessed by third parties)

In the EU, the member state government grant the accreditation. （Listed in the Trusted List）
In Japan, only for electronic signature, the competent authorities grant accreditation based on the e-Signature Act.

Certification based on the criteria of certified public accountants association, etc. （WebTrust for CA）
In Japan, accreditation for Time-Stamping Service by Japan Data Communications Association (JADAC)

JCAN Trusted Service Registration

Third party's authorization is not required.
e.g. corporate system, etc.

Assessment and Registration of JCAN Trusted Service Registration

JIPDEC

JCAN TRUSTED SERVICE

iTrust Remote Signature Service of Cybertrust Japan Co., Ltd. has passed the assessment of JIPDEC, and first registered as trust services related to remote signature.
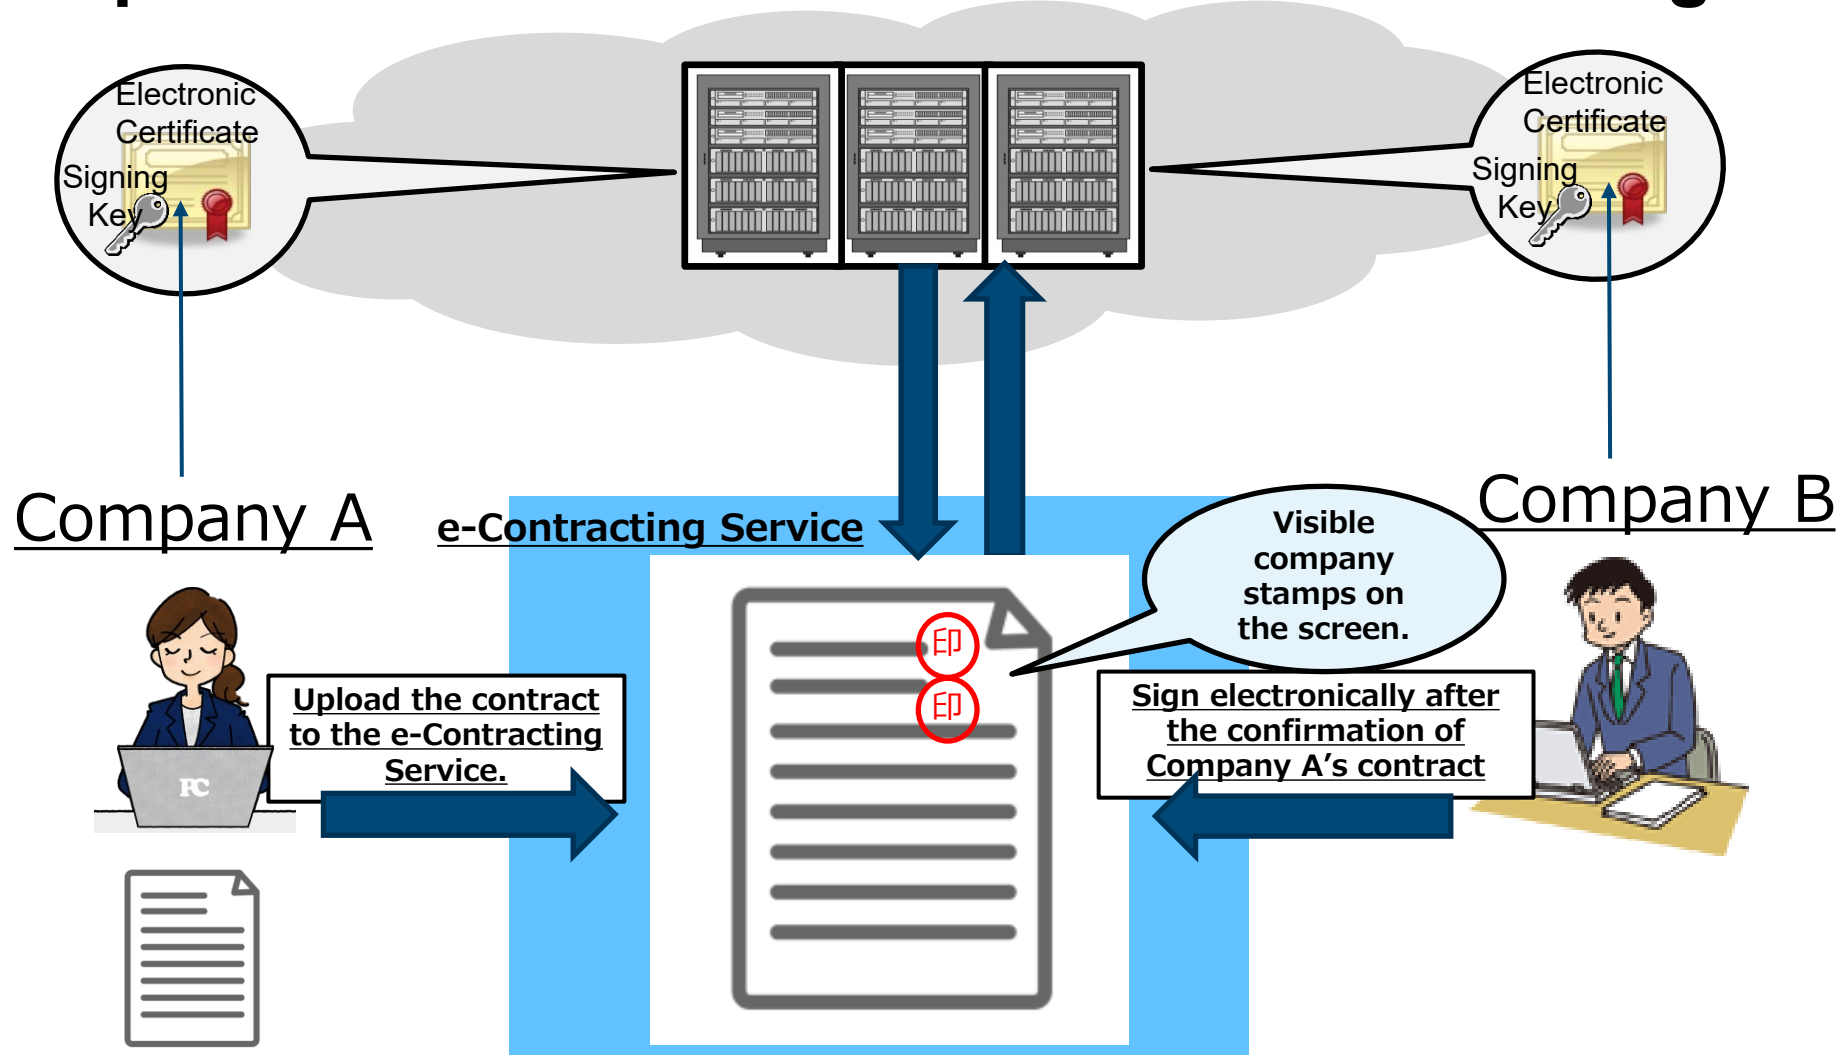

Selection of e-Contracting Services

- **Criteria to select e-Contracting services are necessary.**

- **Especially for SMEs, trustworthy e-Contracting services should be clearly identified.**

Service A   Service B   Service C

Assessment Criteria of Trust

How on earth can we choose the one?

Trusted Service

# Cloud based e-Contracting Services

■ **Simple operation with cloud based certificates management.**
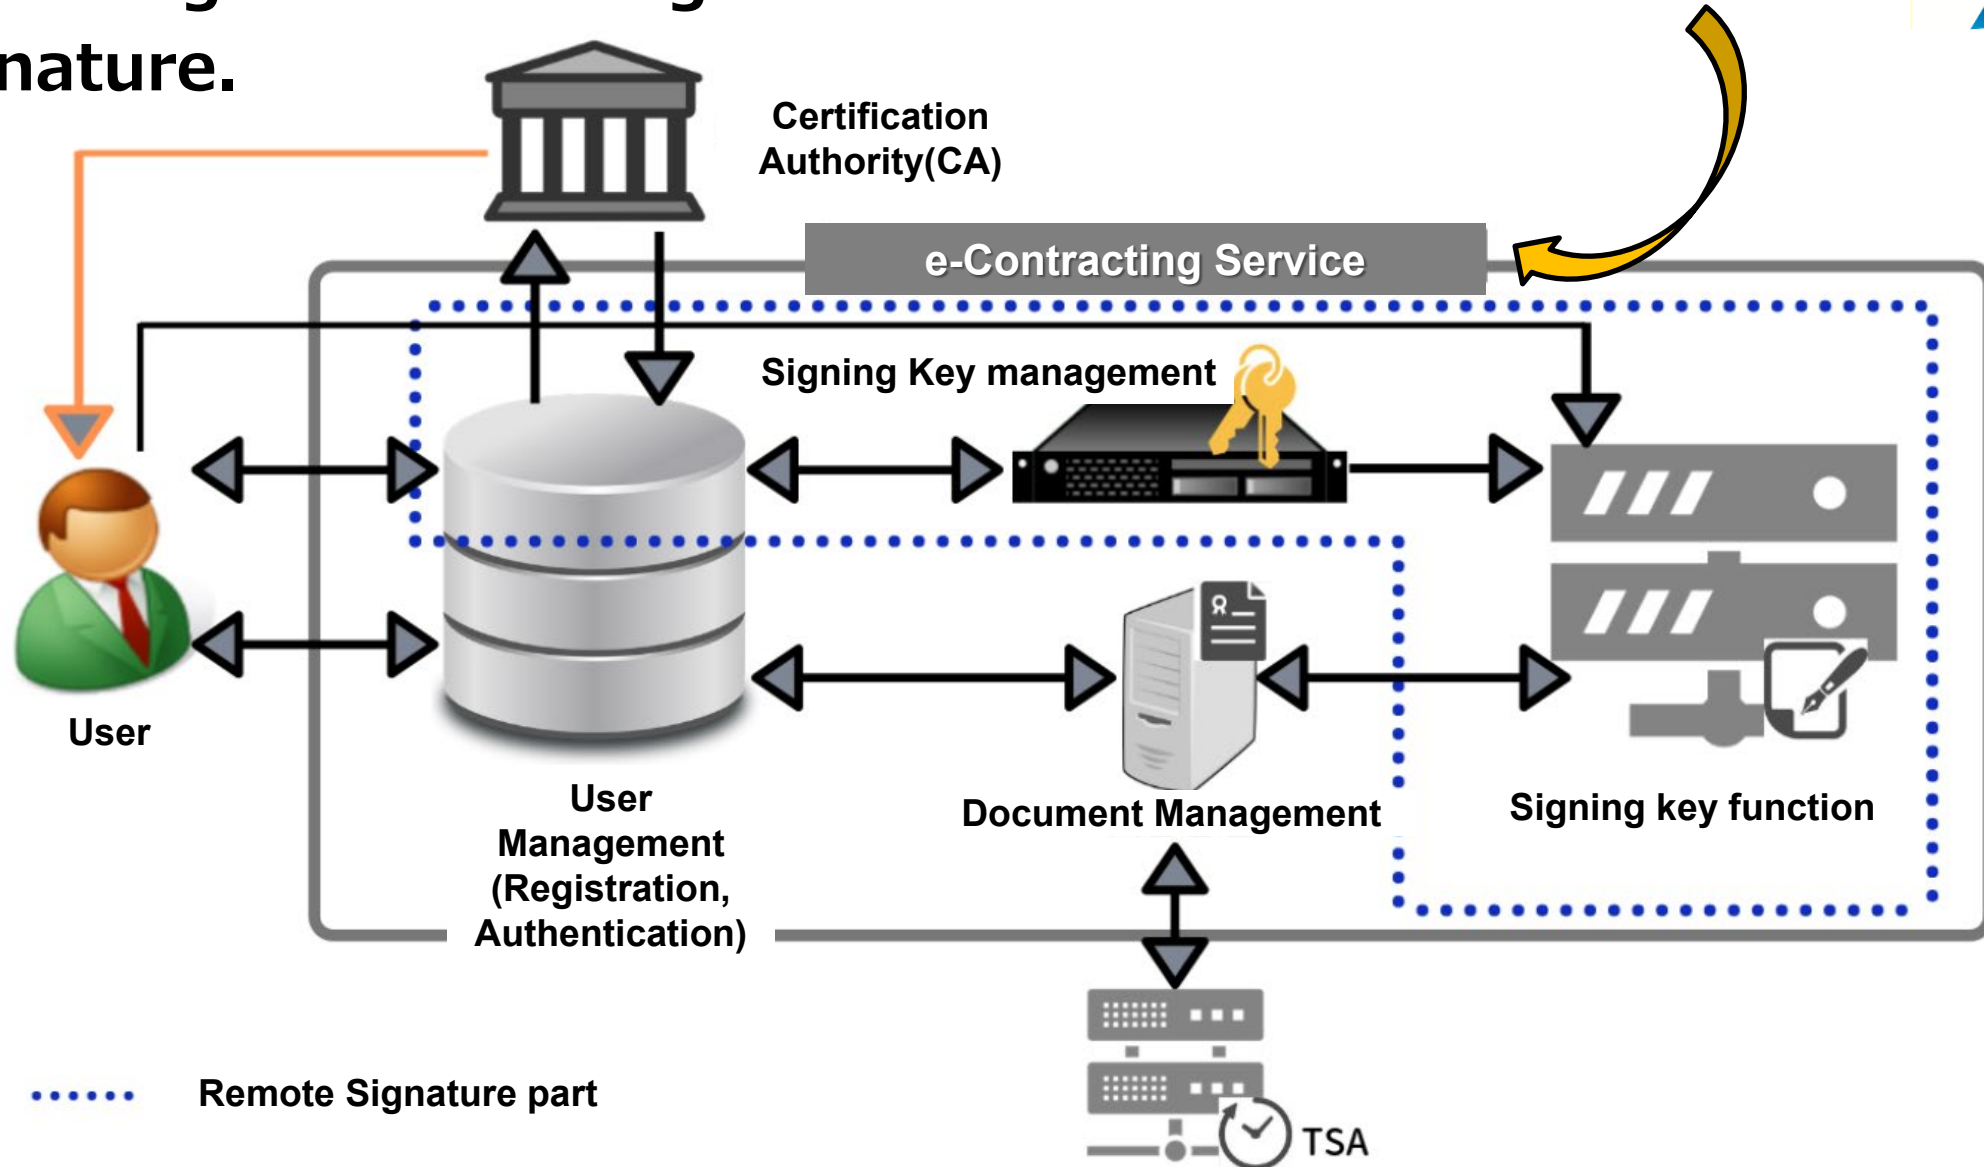

Assessment Items of Certification Authority

**JCAN Trusted Service Registration
（Certification Authority）**

User Management

- Method of issuance application
- Verification of Existence
- Account Management

…etc.

Key Management

- User Key management
- Certification Authority Key management
- Authentication
- Authorization verification
- Cryptographic Module

…etc.

Technical Monitoring

- PACS
- Monitoring
- Unauthorized access
- Interception and Falsification prevention measure
- Misrecognition prevention measures
- FW, IDS

…etc.

Others

- Training
- Certification Practice Statement (CP/CPS)
- Business continuity plan
- Internal audit
- Risk assessment

…etc.

Registration of e-Contracting Services

Assessment Items of e-Contracting Services

```
JCAN Trusted Service
Registration(e-Contracting) –
Remote Signature
```

User Management
- User verification
- User's information management
- Account management
…etc.

Signing Key Management
- Generation of Signing Key
- Signing Key and User identification management
- Protection of Signing Key
…etc.

Electronic Contract Management
- Signature verification mechanism
- Access control to electronic contract
…etc.

Electronic Signature Function
- Electronic signature environment
- Set of Long-term signature
…etc.

Others
- Training
- Business continuity plan
- Internal audit
- Risk assessment
…etc.

５．Toward the Realization of Trust

- **Complete digitization of business documents**

- **Prevention of falsification of data and spoofing**

- **Adoption as procurement criteria, etc.**

- **Cooperation with International standardization activities**

- **Cooperation with assessments for other cloud based services**

JTS Adopted as Bidding Requirements of Acquisition, Technology & Logistics Agency

■ **Electronic Certificate fulfilling the registration criteria is regarded as it is equivalent to the Public Electronic Certificate.**

・**Public Notice No. 163 dated September 14th, 2018**

（**Excerpt from the Specification**）

Issued Electronic Certificate shall be the electronic certificate issued by the Certification Authorities fulfilling "Web Trust for CA Criteria", "ETSI Standards" or "JCAN Trusted Service Registration Criteria".

■xDTM Standard Association

Established in order to develop and manage the standards related to digital transaction management.

Consists of more than 300 companies and governmental non-profit organizations mainly from the US.

JIPDEC became a member in 2017.

Promote digitization of trustworthy documents and process automation as one of the Board Members.

Promotion together with Other Organizations

■ **Japan Data Communications Associations
Japan Trust Service Forum**

➡**Cooperate in research and study, provide and share the
information about trust services, and promote public awareness**

■ **Japan Trust Technology Association**

➡**Discuss and develop technical guidelines about trust services,
and promote public awareness**

Use Case of JTS Registration

■ **JTS Registration (Remote Signature(e-Contract))**

✓ **Cybertrust Japan Co., Ltd.**

- ● **Protect User's Information**
  - ◆ **Management of User Identification Information**
  - ◆ **Management of User's Signing Key**
- ● **Security Management**
  - ◆ **Signature Creation Environment**
- ● **Stable Operation of Business**
  - ◆ **Risk Assessment**
  - ◆ **Business Continuity Plan, etc.**

IT Industry

Use Case of JTS Registration

Strict Operation

■ **JTS Registration (LRA)**

- **Identity Verification**
- **Issuance and Operation Management of Electronic Certificates**
- **Lifecycle Management of Electronic Certificates, etc.**

Critical Infrastructure Industry

✓ **Docusign, Inc.**
Use Case of JTS Registration in Japan

✓ **NS Solutions Corporation**
Spread of e-Contracting Use

JIPDEC for realizing the Internet Trust together with you.
